

CWS – DETERGENTS AND CAR WASH SHAMPOOS

1. SUPER FOAM – MAXI SUDS – a new shampoo containing active polymers which prevents your paint from being scratched. It creates rich foam which enables perfect and in-depth cleaning of your paint. It contains synthetic waxes which enhance shine and impregnation of surfaces of all kinds. Perfect for everyday hand wash, as well as pressure washer cleaning. It is pH neutral.

Product Code: **CWS_101_16** (16 oz)

Product Code: **CWS_101** (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1 Galon)– 3,8 Litre

Maxi Suds II is a brand new car shampoo engineered to create rich foaming bubbles containing highly active polymers which enable perfect and in-depth cleaning of your paint surface. During the foamy reaction the polymers are quickly released and pull out dirt and sediments from the surface. Bubbles with polymers wash the dirt away. After it is rinsed with water it leaves the surface clean, smooth and UV light resistant and restores the original bright colour tone of your paint that

literally shines. Maxi Suds II perfectly cleans and impregnates plastics, rubber sealings and tyres. The shampoo is pH neutral and thanks to water softening technology it doesn't leave any stains, smudges or mineral sediments on the surface.

This nanotechnology-based shampoo contains special lubricants which wrap abrasive residue and lift it, perfectly preventing the surface from being scratched. It can be used on any paint colour. It doesn't wipe off wax that has already been applied. It contains ingredients and synthetic waxes that support your paint shine. During the washing it also impregnates other parts of the body – plastics, vinyls, window sealants and all rubber components.

APPLICATION AND DILUTION: hand wash – add 2 tablespoons of shampoo into 20 L of water. For pressure washer dilute in a ratio 1:6 (1 part product and 6 parts water).

PRODUCT ADVANTAGES:

- high-performance universal cleaner and car shampoo
- perfectly washes and cleans car body and other surfaces of all kinds of materials brand new technology with rich foam and highly active polymers that quickly remove dirt, grease and road dirt.
- an easy working procedure suitable for frequent and quick washing
- it doesn't wash off but maintains waxes, polishing pastes and polishes which have been previously applied.
- ideal for hand wash using a sponge, as well as professional pressure washer cleaning using a foam cannon or a pistol with a nozzle
- do not use the same sponge and cleaning solution on all parts of your car. Tyres and wheels should be washed separately and the body should be washed from the top downwards.
- the shampoo rinses clean and does not leave any dirt or smudges on the surface
- it enables cars and trucks washing in direct sunlight and it perfectly removes all dirt just by washing off.
- it contains water softeners which reduce water stains and mineral sediments
- very good acquisition price and big economic package 3,8 L
- after washing rinse your car with free-flowing water

2. BUG BUGGER GRIME TAR REMOVER(16oz) – an extremely strong **shampoo and grime and stains remover, as well as** a perfect remover of insects from your paint. The product is suitable for everyday hand wash, as well as pressure washer cleaning.

Product Code : **CWS_104_16** (16 oz)
Product Code : **CWS_104** (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser – (16oz) – 0,473 L
Big package can (1Galon)– 3,8 Litre

This universal, extremely strong shampoo and degreaser in one quickly, perfectly and without strain removes dried and squashed insect, asphalt, tar, grease and other grime from paint surface, windscreens, bonnets, coolers, bumpers and headlights. Bug Bugger is manufactured using a special technology to loosen dried and ingrained dirt from the surface without laborious rubbing and scrubbing, typical for ordinary car shampoos. The product can also be easily used

(undiluted) on carpets and fabric floors. **APPLICATION:** The application is very easy, just spray the solution onto a dirty surface, wait 2-3 minutes and wipe it off in a recommended way with a Microfiber towel or use water rinse for firm surfaces. **DILUTION:** When used on body and firm surfaces dilute the product according to desired needs and degree of soiling in a ratio of 1:3 or 1:6 (to 1 part product add water in a given ratio). It leaves fresh neutral scent.

3. EXTREME BODY WASH & SYNTHETICS WAX SHAMPOO- an extremely strong, concentrated car shampoo with conditioners and synthetic waxes designed for hand body wash.

Product Code : **CWS_107_16** (16oz)
Product Code : **CWS_107** (1Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) -0,473 Litre
Big package can (1Galon) - 3,8 Litre

The first Extreme Body Wash Shampoo with conditioners and unique synthetic waxes, all in one. It is a very concentrated product designed for hand body wash with high ability to quickly remove even highly ingrained dirt. This perfect formula with active foam prevents calcium from adhering to the paint surface and forming water stains even with use of hard water. It contains synthetic wax conditioners that prevent the surface from scratching and nourish it at the same time. After washing the surface is maximally shiny. It

can be also used for dark and black paints. No scratches, smudges or wax sediments are created on the paint surface. The product is pH neutral. Super concentrated Body Wash Shampoo needs to be diluted with water before washing.

DILUTION: add 0,030 L (one cap) of the product to 20L of water. This solution with polymers and lubricants creates rich active foam which perfectly and gently cleans the paint surface from dirt. At the same time it impregnates other parts of the body – plastics, vinyls, window sealants and all rubber components. After washing just rinse the surface with water. It does not need to be polished, just wiped dry. The protective film brings high shine and perfectly and over a long period protects the surface from being scratched, as well as from sediments and grime from regular use. The product is ideal for surfaces that

have already been treated with carnauba wax as it maintains the original shiny and smooth surface.

APPLICATION:

- wash the car with water first to remove rough dirt
- mix 0,030 L of the product with 20 L of clear water in a wash bucket.
- always wash tyres and wheels with a sponge and shampoo first
- do not use the same sponge and cleaning solution on all parts of your car. Tyres and wheels should be washed separately.
- the body should be washed from the top downwards and if you wash your car in a direct sunlight rinse the body few times with clean water. Do not let the foam and water dry on your paint.
- after washing rinse your car with free-flowing water

4. HONEYDEW SNOW FOAM Cleanser a special shampoo with gentle active cleaning foam, antibacterial effect and long-lasting honey scent. It is suitable for everyday hand wash, as well as pressure washer cleaning. It is pH neutral.

Product Code :CWS_110_16 (16oz)

Product Code :CWS_110 (1Gal)

EXTERIOR/INTERIOR+ MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) – 0,473 Litre

Big package can (1Galon)– 3,8 Litre

Honey cleaning foam – active shampoo – is designed to create millions of small active cleaning bubbles which quickly remove grime. It can be used as a traditional shampoo or a detergent. Add 1-2 tablespoons of the product into 10 litres of water. It actively and quickly removes all abrasive dirt out of fine surfaces and car parts. The shampoo does not only clean, it also brings long-lasting honey scent which is simply delicate. It is applicable to cargo area of pick-up trucks, interior rubber carpets, additional rubber carpets, rubber doormats, garage

floors and rubber floors in house interiors, everywhere you need to quickly and effectively remove all dirt, with pleasant smell. After application rinse the surface with water.

RECOMMENDATIONS :

- wash your car with a stream of water first to remove rough dirt
- mix 0,030 L of the product with 20L of clear water in a wash bucket
- always wash tyres and wheels with a sponge and shampoo first
- do not use the same sponge and cleaning solution on all parts of your car. Tyres and wheels should be washed separately.
- the body should be washed from the top downwards and if you wash your car in a direct sunlight rinse the body few times with clean water. Do not let the foam and water dry on your paint.
- after cleaning rinse your car with free-flowing water

5. MICROFIBER REJUVENATOR MICROFIBER CLEANING- a cleaning detergent for washing of Microfiber towels and Microfiber application accessories.

Product Code :CWS_201_16 (16oz)

Product Code :CWS_201 (1Gal)

EXTERIOR/INTERIOR+ MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) - 3,8 Litre

Microfiber Cleaning is the first cleaning detergent with fresh natural long-lasting lemon scent which is specifically designed to perfectly clean, wash, rejuvenate and maintain Microfiber towels without any damage. Repeated washing with regular cleaning detergents is unsuitable because Microfiber towel loses its special qualities. It loses its absorbent and antistatic qualities and its velvet surface becomes rough. The unique composition of this concentrated cleaner contains professionally prepared water mixture with hard water softener, lemon solution and SPO

dissolver. This solution perfectly and quickly removes all stains, grease, wax, polish, oil, contamination and dirt from Microfiber towels + cotton towels without damaging individual fibers. It restores velvet delicacy and natural cleaning ability of Microfiber with each washing. Microfiber Rejuvenator is concentrated. For heavily polluted Microfiber add 2-3 tablespoons of the product into 10 L of water. For minor pollution use one tablespoon of the product. **WARNING:** Never use any kind of bleaching agent or softener when washing Microfiber towels!!! WASH at **30°C at maximum** – in wool wash programme.

6. GLOSSWORKZGLOSSBOOSTER AND PAINTWORK CLEANSER (16 oz)

– a pH balanced shampoo with high content of synthetic waxes for stronger and enhanced shine. This nano technology elevates wax or polish protection and is biodegradable, nontoxic, environment-friendly and with no aggressive cleaners. It is fine enough to be used on newly painted or waxed paints. It is suitable for everyday hand wash, as well as pressure washer cleaning. It is pH neutral.

Product Code :CWS_133_16 (16oz)

Product Code :CWS_133 (1Gal)

EXTERIOR / INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) – 0,473 Litre

Big package can (1Galon) - 3,8 Litre

Glossworkz is a pH balanced shampoo containing synthetic waxes for stronger and enhanced shine. This nano technology elevates wax or polish protection and is biodegradable, nontoxic, environment-friendly and with no aggressive cleaners. It is also fine enough to be used on newly painted or waxed paints.

PRODUCT ADVANTAGES :

- it perfectly washes and cleans car body (paints) and other surfaces of all kinds of materials
- an easy working procedure suitable for frequent and quick washing

- It never washes away waxes, polishing pastes, polishes or other previously applied impregnations. On the contrary it maintains waxes and maximalizes high shine
- ideal for hand wash using a sponge, as well as professional pressure wash using a foam cannon or a pistol with a nozzle.
- the product enables cleaning of cars or trucks in direct sunlight and it perfectly removes all dirt just by washing it off. After being washed off with water the product does not leave any dirt or smudges on the surface.
- very good acquisition price
- it is environment-friendly – contains minimum amount of chemicals

APPLICATION: add 2 caps (or 2 tablespoons) of Glossworkz shampoo into 20L of water. This solution with high and very slippery foam perfectly washes the body surface. This new **(High - Tech)** nano technology contains super active „slick“ polymers which surround dust and dirt particles and other contamination, pull them out of the surface so they can be easily and safely removed by washing them away with water. The product does not form holograms or scratches your paint during the washing. This new universal cleaner is pH neutral and can be used on any surface and paint shade.

The product is also suitable for plastic and vinyl materials, as well as wheels and tyres. Maintaining and impregnating of your car paint with protective waxes or impregnation pastes to protect your paint from ultraviolet light, water stains and dirt is very important. Glossworkz is a perfect product for these purposes.

RECOMMENDATION:- always wash tyres and wheels with a sponge and shampoo first
- do not use the same sponge and cleaning solution on all parts of your car. Tyres and wheels should be washed separately.
- the body should be washed from the top downwards.
- after the cleaning rinse the car with free-flowing water

7. CITRA WASH PAINTWORK CLEANSER—a special Hyper nano shampoo containing synthetic waxes, citrus scent and active polymers which protect your car paint from being scratched. It creates rich foam which enables perfect and in-depth cleaning of your paint. It contains synthetic waxes which enhance shine and impregnation of surfaces of all kinds. Perfect for everyday hand wash, as well as pressure washer cleaning. It is pH neutral.

Product Code : **CWS_302_16** (16oz)

Product Code : **CWS_302** (1Gal)

EXTERIOR / INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) – 0,473 Litre

Big package can (1Galon) - 3,8 Litre

Citrus Daily Car Wash ExtremeSuds— is the best, pH balanced and citrus-based Hyper shampoo, manufactured by a new Nano technology for everyday safe and perfect washing. It is biodegradable, nontoxic, environment-friendly and with no aggressive cleaners. It does not wash away previously applied polishing pastes or polishes from your paint. On the contrary it enhances and maximalizes perfect shine. Moreover the shampoo

with a unique nano technology contains special lubricants which wrap the abrasive

residue and lifts them, perfectly preventing the surface from being scratched. During the application it creates unmatched foam which perfectly surrounds dust and dirt particles and other contamination and pulls them out of the surface so they can be easily and safely removed by washing them away with water. **APPLICATION:** Dilute Citrus Daily Car Wash by adding 1 can of the product into 5 gallons of water (in a ratio 1 : 50). It is an ideal shampoo for all foam cannons, pressure washers, foam pistols with a nozzle and other devices which create rich snowy foam.

PRODUCT ADVANTAGES:

- a pH neutral, highly effective, universal cleaner and car shampoo
- it perfectly washes and cleanses your car body and other surfaces of all kinds of materials
- brand new technology with rich foam and highly active polymers which quickly removes dirt, grease and road dirt.
- an easy working procedure suitable for very frequent and quick washing
- it does not wash away but protects previously applied waxes, polishing pastes and polishes.
- ideal for hand wash using a sponge, as well as professional pressure wash using a foam cannon or a pistol with a nozzle
- always wash tyres and wheels with a sponge and shampoo first
- do not use the same sponge and cleaning solution on all parts of your car. Tyres and wheels should be washed separately and the body should be washed from the top downwards.
- after being washed off with water the product does not leave any dirt or smudges on the surface
- the product enables cleaning of cars or trucks in direct sunlight and it perfectly removes all the dirt just by washing off.
- the product contains water softeners good for reduction of water stains and mineral sediments
- very good acquisition price and economic big package 3,8 L
- after overall washing rinse the surface with free-flowing water

RECOMMENDATIONS:

- wash the car with a stream of water first to remove rough dirt
- mix 0,030 L of the product with 20L of clear water in a wash bucket.
- always wash tyres and wheels with a sponge and shampoo first
- do not use the same sponge and cleaning solution on all parts of your car. Tyres and wheels should be washed separately.
- the body should be washed from the top downwards and if you wash your car in a direct sunlight wash the body few times with clean water. Do not let the foam and water dry on the body paint.
- after the cleaning finally rinse the car with free-flowing water

8. Mr. PINK SUPER SUDS SHAMPOO& SUPERIOR SURFACE CLEANING SOAP– a unique Nano detailing shampoo with active polymers which enables in-depth cleaning of road dirt and other contaminations. It contains synthetic waxes. It is suitable for everyday hand wash, as well as pressure washer cleaning. It is pH neutral.

CLD – CLEANERS AND DEGREASERS

1. ALL CLEAN ALL PURPOSE INTERIOR / EXTERIOR DEGREASER AND CLEANER– is a universal cleaner for all interior surfaces. It perfectly removes grime, is antistatic, impregnates for a long time and restores the original colours of materials.

ProductCode : **CLD_1010_16** (16oz)

ProductCode : **CLD 1010** (1Gal

EXTERIOR / INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) – 0,473 Litre

Big package Can (1Galon)– 3,8 Litre

This perfect universal cleaner, with a pump, is applicable to vinyl, plastic, varnished parts, engine compartments, fabric, glass, carpets, tyres, rubber and other dirty surfaces. It both cleans and with a long-term effect impregnates dashboards, interior and engine plastics, seats, fabric door covers, door jams, luggage and engine compartments. In the long term it prevents dust and microparticles from settling on the surface. It cleans without unpleasant smell, typical for other cleaners, and leaves a pleasant chemical etheric scent. At the same

time it has disinfectant effects and does not leave any smudges or stains. It restores the original qualities and colours of materials. The use of All Clean is multifunctional and very easy. Just spray it onto a dirty surface, wait for 3-5 minutes, make a foamy film on the surface with a circular motion and wipe off with a Microfiber cloth in recommended way. You can repeat this process several times till the surface is perfectly clean and without any undesirable local stains. Soft brush can be used for tough dirt. **ALL CLEAN MUST BE DILUTED ACCORDING TO THE STATE AND DIRT OF THE SURFACE:** If the surface isn't heavily soiled, dilute in a ratio of **1 : 10 (1part product and 10 parts water)**. For heavily soiled surfaces dilute the concentrate in a ratio of **1 : 4 (1part product and 4 parts water)**. 100% concentrate is used for removal of tough grime, for undercarriages, tyres and engines. For faster evaporation and drying out, especially when the cleaning process needs to be repeated several times due to tough dirt, heat gun can be used from the distance of 40 cm to quickly dry the surface out.

WARNING: When cleaning fabric seat covers and upholstery prior test on the rear bottom part of the seat is recommended!!

2. GRIME REAPER EXTREMELY STRONG DEGRASER—the strongest cleaner and degreaser from the Chemicalguys series, applicable to all kinds of surfaces except for genuine leather. It perfectly cleans and degreases wheels, hubcaps, exhaust pipes end-pieces, undercarriages and engine compartments. It can also be used for heavily ingrained and greasy stains on carpets, upholstery and seat covers.

ProductCode : **CLD_104_16** (16oz)

ProductCode : **CLD 104** (1Gal)

EXTERIOR / INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) – 0,473 Litre

Big package Can (1Galon)– 3,8 Litre

GrimeReaper is the latest and strongest cleaner and degreaser from the CG series applicable to all kinds of surfaces.

WARNING— it can't be used for leather interiors and natural leather. This product quickly and reliably removes aged grime, grease, asphalt, tar, oxidation on the surface of exhaust pipes and wheels, and heavily ingrained brake pad contamination. The product can be used for cleaning of engines, engine

compartments, as well as ingrained dirt on carpets and fabric surfaces (carpets + seat covers, fabric upholstery in doors and luggage compartments). This professional product even fully removes extreme industrial and road contamination and dirt.

Product advantages:

- very quickly and perfectly removes even the toughest grease and grime
- is applicable to any contaminated surface of industrial equipment, cars, motorbikes, ships and boats and machines
- quickly removes brake dust and any kind of oxidation from wheels and exhaust pipes end-pieces,
- easily and with maximum speed dissolves oil, grease and ingrained natural fat
- after cleaning the surface is perfectly clean and dry and usable in a short while.
- the product is 100% concentrate which can be diluted according to desired needs up to a ratio of 1 : 10, depending on an intensity and type of dirt.
- Grime Reaper also removes dirt from undercarriages. For a long term impregnation and perfect protection of undercarriages the use of Bare Bones Undercarriage product is recommended.

WARNING: When cleaning fabric seat covers and upholstery prior test on the rear bottom part of the seat is recommended!!

3. EXTREME ORANGE SUPERCONCENTRATED HEAVY DUTY DEGREASER

– highly concentrated degreaser and cleaner for oil contamination and heavily ingrained grease and dirt. Ideal for engine compartments, undercarriages and ingrained greasy dirt and stains on carpets and fabric.

ProductCode :CLD_201_16 (16 oz)

ProductCode :CLD_201 (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) – 0,473 Litre

Big package Can (1Galon)– 3,8 Litre

ExtremeOrangeDegreaser is a highly concentrated degreaser and a very effective cleaner. It consists of active cleaners and water-soluble degreasers. It immediately dissolves old, ingrained, greasy and other dirt. **The product must be diluted** in a ratio of **1 : 6 (1 part product and 6 parts water)**. The use of the EXTREME ORANGE cleaner is multifunctional and very easy. Just spray it onto a dirty surface, wait for 3 – 5 minutes, make a foamy film on the surface with a circular motion and wipe it off with a Microfiber cloth in recommended

way. You can repeat the process several times till the surface is perfectly clean and without any undesirable local stains. Soft brush can be used for tough dirt. For faster evaporation and drying out in car interiors, especially when the cleaning process needs to be repeated several times due to tough dirt, heat gun can be used from a distance of 40 cm to quickly dry the surface out. The product can be used for undercarriages, wheels, tyres, oil and grease stains on carpets and upholstery, engines and engine compartments. For industrial use (workroom and garage floor) spray the product onto a heavily soiled surface, remove tough dirt using a brush and then wash it off with water. To achieve perfect cleanness repeat the cleaning process.

WARNING: When cleaning fabric seat covers and upholstery prior test on the rear bottom part of the seat is recommended!!

4. WHEEL AND RIM CLEANER - Premium Blue cleaner– cleans wheels, rims and hubcaps with a very quick and effective result. It quickly removes brake caps dust, oxidation, asphalt, tar and road dirt.

ProductCode :CLD_203_16 (16 oz)

ProductCode :CLD_203 (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) – 0,473 Litre

Big package Can (1Galon)– 3,8 Litre

Wheel & Rim Cleaner is the best and quickest cleaner for wheels, hubcaps and tyres on global market. Spray the product onto a rim surface and wait for 3 – 5 minutes. It immediately dissolves settled dust from brake pads, road dirt, asphalt, tar, rust and other grime without any wheel damage. Then wash the surface with a sponge and shampoo. Finally wash the surface off with a stream of water which restores the original shine of the wheels. **The product must be diluted** according to wheel dirt intensity.

If the wheel surface isn't heavily soiled dilute in a ratio of **1 : 5 (1 part product and 5 parts water)**. For a heavily soiled wheel surface dilute the concentrate in a ratio of **1 : 3 (1 part product a 3 parts water)**. **100% concentrate** is used for extreme grime at the spokes. These should be cleaned locally with a use of a Microphase cloth or an electric brush SonicScrubber after spraying the product on the surface. The cleaning process can be repeated several times for a perfect result.

5.WINDOW CLEAN / GLASS CLEANER - AMMONIA FREE RE – an extra strong, ammonia-free cleaner for windows and glass. It perfectly removes settled smoke and dirt from glass and doesn't leave smudges or stains

ProductCode :**CLD_202_16** (16 oz)

ProductCode :**CLD_202** (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) – 0,473 Litre

Big package Can (1Galon)– 3,8 Litre

This new, extra strong cleaner for glass and windows, combined with WaffleWeave Microfiber cloth, which was specifically developed for this purpose, perfectly cleans all dirt on the inside and outside of windows. Microfiber cloth „WW“ perfectly polishes the surface. This highly effective combination is a perfect solution to laborious removing of settled dirt, smoke and smudges from glass and windows and their inaccessible corners.

RECOMMENDATION: You need 2 Microfiber cloths WaffleWeave. One for interior use and the other for exterior surfaces. The product is nontoxic and ammonia-free. It doesn't damage surface of attached solar, safety and security films. It's use is multifunctional – besides glass the product can be used for headlights, indicators, taillights and other glass panes. The product can be diluted with distilled water in a ratio of 1 : 1. **Product advantages:**

- product of the year 2011 in LA, USA
- perfect glass cleaning without use of hard chemicals
- perfectly removes greasy stains, insects and bacteria
- cleans and polishes windows without leaving smudges and dirt
- leaves the surface shiny
- works as windshield rain repellent

6. STICKY GEL CITRUS WHEEL + RIM CLEANER – a very effective cleaner for wheels, rims and hubcaps that doesn't drip. Because of its gel consistence it remains longer on the surface and so removes brake dust, oxidation, road dirt and grease better

ProductCode :**CLD_105C_16** (16 oz)

ProductCode :**CLD_105C** (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) – 0,473 Litre

Big package Can (1Galon)– 3,8 Litre

„Sticky Gel Citrus Cleaner“ is the most effective and safest cleaner for wheels, hubcaps and other wheel covers. Thanks to a special technology and thicker consistence it sticks to the surface and doesn't drip down, which provides a lot of time to quickly and perfectly clean the wheel. Longer time of product action on the surface allows it to better dissolve road dirt, brake dust, oxidation, oil and other dirt.

The unique technology contains molecules of

hydrofluoric acid which dissolve all the settled contamination and make the wheels look as new.

APPLICATION: The product is 100% concentrate which can be diluted with water according to desired needs and degree of soiling in a ratio of 5 : 1 (1part product) which means that you can make 25 L of cleaner from one bottle (16 oz) 0,473L. For heavily soiled wheels use of a stronger concentrate is recommended. Spray the product onto the surface and wait for 5 minutes. Then wash it off with a stream of water which washes away loosened dirt. In case of remaining stains and contamination on the surface repeat the process and for stronger effect use Microfiber cloth, soft brush or coarse sponge. The product is pH neutral and was specifically developed for all surfaces of wheels and rims, and to make the work safe and effective.

7. GLASS WORKZ CLEANER W/POMEGRANATE SCENT – a professional cleaner for windows and glass, with alcohol content and fresh pomegranate scent.It quickly and perfectly removes cigarette smoke and grease from outside and inside glass.

ProductCode :**CLD_680_16** (16 oz)

ProductCode :**CLD_680** (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) – 0,473 Litre

Big package Can (1Galon)– 3,8 Litre

Glassworkz is the first professional cleaner for glass on global market which was developed to quickly remove even the heaviest grime from glass panes, headlights, taillights, plastic panes and navigation screens, and to clean these surfaces perfectly. The glass surface is then maximum clean and crystal clear. The product is bio-degradable and environment-friendly. In contrast to other glass cleaners it contains alcohol instead of ammonia. In addition, the pomegranate scent makes your work more pleasant which

will be appreciated especially when cleaning the inside glass, in the interior. Thanks to its

unique formula Glassworkz makes glass cleaning maximum easy and perfectly removes road grime, settled cigarette smoke and grease both from outside and inside glass. It ensures perfect visibility for drivers, which contributes to safety on road and passengers protection significantly. The product also impregnates the surface, preventing settling of any contamination, and is maximum gentle to other materials. Glassworkz is gentle to surface of solar films, which are perfectly cleaned and impregnated for a long time.

APPLICATION : Using the atomizer spray the product onto the microfiber cloth and apply to a treated surface. Then use WaffleWeave Microfiber cloth, which was specifically developed for this purpose, or regular microfiber cloth to wipe the surface off so there are no smudges or stains left. Repeat the process according to your needs....

8. DIABLO – WHEEL CLEANER - GEL CONCENTRATE– is a water-based, PH neutral gel cleaner for wheels, hubcaps and other surfaces. It perfectly removes brake dust, road dirt and other contamination without any mechanical friction. It is heavily concentrated.

ProductCode :CLD_997_16 (16 oz)

ProductCode :CLD_997 (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) – 0,473 Litre

Big package Can (1Galon)– 3,8 Litre

Diablo Gel is a water-based, pH neutral, non-corrosive cleaner maximum safe for any surface, especially for polished, chrome, stainless and carbon wheels and also for wrapped wheels. The product uses a new technology of „concentrated suspension“ that wraps all contamination and dirt, encapsules it and lifts it away from the surface. Thanks to slimy gelatin it is easily removed by washing it off. As easily and quickly you can remove brake dust, dirt and road grime from wheels, rims and

hubcaps without any mechanical friction and scrubbing that can scratch and damage the surface.

APPLICATION: Apply the product onto a dirty surface and wait for about 5 minutes. Then wash it off with a stream of water. For heavy contamination repeat the cleaning process and use a soft brush.

POLISHING WAXES, PRODUCTS WITH CARNAUBA OR SYNTHETIC WAXES AND DETAILING POLYMER SPRAYS

1. LUBER - SYNTHETIC SUPER LUBE - slickest Clay & CLAY BLOCK lubricant & Detailer – a cleaning and lubrication solution designed for decontamination of your car paint and other surfaces using a decontamination matter - Clay Bar.

Product Code :**WAC_CLY_100_16** (16 oz)

Product Code :**WAC_CLY_100** (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

Super Luber is a cleaner and lubricant containing wax and lube designed to quickly clean your paint and easily provide your paint with high shine. Always apply the product after you wash your car. This cleaner, based on lube polymers (especially designed to enhance sliding and reduce friction), is great for application and right function of decontamination matter, such as Clay Grey Bar, Clay Blue Bar or Smart Clay Block. Or other available decontamination matters.

PRODUCT ADVANTAGES:

- it minimizes risk of scratching your paint during decontamination, it is easy to spread and polish off.
- it carefully cleans contaminated and matte surface of your paint from road dirt, brake pads dust, industrial fallout, water stains, tar and other contaminations.
- easy application by spraying onto the bodywork and quick polishing off with a special Microfiber towel after the cleaning procedure (decontamination).
- it creates deep wet shine finish in a few seconds. All without strain or excessive pressure.
- it does not discolour and does not leave stains or smudges. It provides long-term impregnation of your paint and fresh "Bubble gum" scent. It impregnates all parts of the bodywork, plastics, rubber sealings, window sealants, tyres and windows.
- in combination with Clay Gray Bar or Clay Blue Bar clay bars, or even with Smart Clay Block sponge, it manages to restore the original colour and shine of your faded and matte paint. And with well-preserved paints you can reach perfectly clean Top Glanz which makes your paint look like new.
- it can be used even in direct sunlight without leaving stains or smudges.
- in contrast to rival products that are based on detergents it does not decompose decontamination bar and does not reduce its durability.
-

APPLICATION:

- the product is extremely lubricative when not diluted. Even when diluted by distilled water in a ratio of 1:1 (recommended for experienced users) the product's abilities exceed all competition.
- concentrated product can be applied on wet surface of your car which causes natural dilution of the product.
- shake the product thoroughly before use Sedimentation of the product during its storing does no harm.

2. BUTTER WET WAX CAR WAX – WET LOOK SHINE – a special polish with polymers and genuine carnauba wax. It provides deep wet-looking shine and does not leave any stains on plastic or rubber parts of your car.

Product Code :WAC_201_16 (16 oz)

Product Code :WAC_201 (1 Gal)

EXTERIOR

Regular package with dispenser (16 oz) – 0,473 Litre (560g)

Big package can (1Galon) – 3,8 Litre

BUTTER WET WAX is a unique revolutionary product containing natural carnauba wax which delivers an unmatched deep wet shine finish after application and perfect polishing off with a special Microfiber towel. It can be applied on any synthetic wax as **an ideal finishing product** to maximally enhance wet-look effect. It is formulated with a brand new technology which contains special blend of polymers, resin and pure natural carnauba wax.

BUTTER WET WAX does not contain any cleaning or abrasive additives.

PRODUCT ADVANTAGES:

- very easy application and polishing off delivering wet-look shine effect
- the product can be applied in high temperatures, even in direct sunlight
- maximum effect can be achieved with dark, as well as other colour shades
- the product guarantees long-term impregnation and protection against UV light for up to 1 year. All that with banana scent.
- there is no product residue on rubber and plastic parts of your car after the application.
-

HAND APPLICATION:

- shake the product well before use
- apply a thin coat of the product on perfectly clean and optimally decontaminated surface of your paint, using a foam applicator or Microfiber towel of quality cotton/microfiber
- we recommend that you use CG applicators.
- on horizontal surfaces (bonnet, roof and boot lid) apply the product with a backward-and-forward motion. On vertical surfaces apply the product with a side-to-side motion
- apply the product softly and do not push.
- apply the product one part at a time let the product dry for a while
- polish the surface of an individual part off perfectly using a Microfiber towel immediately after you finish application of the product on each part
- after the application wash your car with a Chemical guys car shampoo which does not wash off waxes.

3. EXTREME TOP – COAT PAINT SEALANT – a sealant which is a perfect combination of synthetic sealant and white carnauba wax. It guarantees high resistance of the surface and professional high shine. This high-tech nanotechnology creates nearly unbreakable protection against UV light and grime and delivers antistatic surface with unmatched durability. The product can be applied in layers to reach perfect consistent spreading.

Product Code :WAC_110_16 (16 oz)

Product Code :WAC_110 (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre (560g)

Big package can (1Galon) – 3,8 Litre

This synthetic sealant is a perfect combination of a high-performance sealant (maximum protection) and white carnauba wax (extremely high shine) in one product. This unique blend guarantees high surface resistance, protection and extreme shine and raises professional detailing to the highest level. This high-tech Nanotechnology contains a unique blend of resistant polymer sealants made of natural oils, fluorine resin and white Brazilian carnauba wax of highest quality. The

product's perfect composition creates nearly unbreakable protection against UV light and ingraining of dirt into your paint. It creates a thin protective coat on the treated surface which protects it from oxidation caused by chemicals that are diffused in air and industrial fallout and that stick to the surface of your paint. This blend with a perfect balance of silicon polymers forms perfectly smooth, antistatic surface with unmatched longevity that prevents the surface from its contamination, from untimely ageing and paint fading. It provides top protective coat which repels water and surface contamination. Extreme Top Coat works as a cream for paint protection. It perfectly bonds to the surface of your paint and is applicable in layers. We therefore recommend that you apply one more layer of the product to achieve maximally consistent spreading and perfect protection of your paint. Afterwards polish it off with a Microfiber towel. Application in layers intensifies shine and multiplies level of protection without discolouring paint of your bodywork.

PRODUCT ADVANTAGES:

- it creates an unbreakable shield and perfect protection against radiant heat during summertime
- it delivers unmatched deep wet shine effect
- it protects against UV light, salt, air contamination, snow, insects, road dirt, aggressive detergents and chemicals.
- smooth, antistatic surface with unmatched longevity, which repels water and dust.
- it can be applied in layers to reach perfect look and better protection.
- it leaves fresh vanilla scent after the application and does not leave product residue on rubber or plastic parts of your car.
- high resistance to detergents
-

APPLICATION:

- apply a thin coat of the product on perfectly clean and optimally decontaminated surface of your paint
- using a foam applicator or Microfiber towel of quality cotton/Microfiber
- we recommend that you use CG applicators.
- apply the product softly and do not push. Apply the product separately on each part of the bodywork.

- apply the product and polish it off one part at a time.
- polish the surface of an individual part off perfectly using a Microfiber towel immediately after you finish application of the product on each part
- after the application wash your car with a Chemical guys car shampoo which does not wash off waxes or sealants.

4. M – SEAL PURE PAINT SEALANT - a product containing Nano particles which perfectly fill cracks and pores of your paint. It maximally bonds to the surface and can be applied in layers. It creates perfectly smooth antistatic surface with mirror shine look and unmatched longevity.

Product Code :WAC_113_16 (16 oz)

Product Code :WAC_113 (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

M - Seal Micro Finish uses nano particles of a size 75000 times smaller than a human hair diameter which incorporate into the structure of your paint and provide it with or restore extraordinary shine, protection and durability. The product's perfect composition creates nearly unbreakable protection against UV light and ingraining of dirt into your paint. During the application the product fills cracks and pores in your paint and then creates a thin coat on the treated surface which protects it from oxidation caused by

chemicals that are diffused in air and industrial fallout and that are stuck to the surface of your paint. M-Seal perfectly bonds to the surface and is applicable in layers. We therefore recommend that you apply one more layer of the product to achieve maximally consistent coating and perfect protection of your paint. After the application polish the surface off perfectly. The refined nanotechnology forms perfectly smooth, antistatic surface with unmatched durability that prevents the surface from its contamination, from untimely ageing and paint fading. The antistatic components repel dust particles and reduce contamination of your paint. The product can be used for both new and pre-owned cars, ships, boats, jet skis, utility vehicles, motorcycles, caravans, recreational vehicles, fibreglass, planes and other surfaces.

PRODUCT ADVANTAGES:

- it creates unbreakable shield and protects against radiant heat
- it delivers unmatched deep wet shine effect
- it protects against UV light, salt, air contaminations, snow, insects, road dirt, aggressive detergents and chemicals.
- M-Seal can be applied in layers to reach perfect look and protection
- there is no product residue on rubber and plastic parts of your car after the application.

APPLICATION:

- apply a thin coat of the product on perfectly clean and optimally decontaminated surface
- using a foam applicator or Microfiber towel of quality cotton/microfiber
- we recommend that you use CG applicators.
- apply the product softly and do not push.
- apply the product separately on each part of the bodywork.

- apply the product and polish it off one part at a time.
- polish the surface of an individual part off perfectly using a Microfiber towel immediately after you finish application of the product on each part
- after the application wash your car with a Chemical guys car shampoo which does not wash off waxes or sealants.

5. P40- DETAILER + CARNAUBIA 1X – QUICK DETAILER SPRAY- a detailer with natural white Brazilian carnauba wax. This product of very high cleaning ability does not wash off but restores previously applied waxes. It can be used as an extremely easily applicable quick wax. It provides your paint with unmatched shine and long-lasting protection.

Product Code :WAC_114_16 (16 oz)

Product Code :WAC_114(1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre (560g)

Big package can (1Galon) – 3,8 Litre

P40 Detailer Spray is the only Chemical Guys' product that contains natural ultra refined white Brazilian carnauba wax. Pro Detailer combines cleaning qualities of a detailing spray and unmatched shine with a perfect protection against UV light provided by carnauba wax. P40 Detailer Spray contains modified cleaners which gently remove dirt, oxidation, dust, water stains, finger

prints and smudges. The product can be applied in direct sunlight or in shade. Regular application of the product prolongs longevity of previously applied waxes and sealants. The product is perfect for the maintenance of cars that have been treated with a carnauba wax because it restores and revives the original protective coat and also provides deep shine specific for carnauba waxes. It can be used as extremely easily applicable quick wax. Due to its high cleaning ability and maximum safety it is also suitable for cleaning of heavily contaminated and dusty surfaces without water, just spray it on the surface, wait for a while and allow the active components to penetrate the layer of dirt and wrap dust particles, and finally wipe it off with a quality Microfiber towel. Shake the product well before use.

PRODUCT ADVANTAGES:

- it minimizes risk of scratching your paint during decontamination, it is easy to spread and polish off.
- it carefully cleans contaminated surface of your paint from road dirt, brake pads dust, industrial fallout, water stains, tar and other dirt.
- easy application by spraying on the bodywork and quick polishing off with a special Microfiber towel after the cleaning procedure (decontamination).
- it creates deep wet look shine finish in a few seconds. The application is possible without strain or excessive pressure and leaves fresh fruit scent.
- it does not leave any stains or smudges. It enhances shine and delivers long-lasting impregnation to your paint and other parts of the bodywork, as well as plastics, rubber sealings, window sealants, tyres and windows.
- it can be used even in direct sunlight without leaving dried stains or smudges.
- it cleans and protects all painted surfaces, laminates and carbon, as well as rubber and plastic parts, glass and metal, chromium and parts of polished/cut aluminium.
- there is no product residue on rubber and plastic parts of your car after the application.

6. EXTREME SLICK SYNTHETIC – POLYMER DETAILER– an antistatic detailing spray delivering immediate shine effect, minimum friction and strong protection against UV light. It creates an ultra thin protective coat with bright surface on any paint shade, but it is especially great for dark, black and red paint shades.

Product Code :WAC_116_16 (16 oz)

Product Code :WAC_116(1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

This fully synthetic detailing spray with liquid lubricating polymers formulated on the basis of resin and acrylic shine enhancers is designed to maximize the look of your paint immediately. It immediately delivers deep shine effect to any surface. Due to its composition it leaves deep mirror-shine look and slick wet finish with long durability. The use of extremely effective lubes makes the product a detailer with the lowest friction coefficient (the friction is reduced up to 75 %). This quality is reflected in the treated surface which gains an extreme slipperiness and maximum antistatic qualities. No only does the antistatic composition clean, it also minimizes dust settling (up to 50 %) and clinging of fingerprints to the treated surface. It significantly reduces a risk of scratching gently painted surfaces. It creates an ultra thin protective coat with bright surface on any paint shade, but it is especially great for dark, black and red paints. The product was designed for needs of demanding perfectionists.

EXTRAORDINARY QUALITIES:

The product is universally applicable in offices and households - for TV screens, mobile phones, tablets and PCs, including their monitors, kitchen cabinets doors, glass panels on tables and all other glossy, painted or metal surfaces

PRODUCT ADVANTAGES:

- the product is applicable in humid conditions or in direct sunlight
- it immediately enhances visual effect of any sealant or wax with a minimal strain. Just spray it on and polish off.
- it is universally applicable to all glossy surfaces, including painted surfaces, glass, carbon, plastics, chromium and stainless steel
- maximum lubricating and antistatic qualities with immediate effect
- it is a suitable lube for decontamination bars - clays
- it contains protective anti-corrosion components
- there is no product residue on rubber and plastic parts of your car after the application.

APPLICATION:

- apply a thin coat of the product on perfectly clean and optimally decontaminated surface
- using a foam applicator or Microfiber towel of quality cotton/microfiber
- we recommend that you use CG applicators.
- apply the product softly and do not push.
- apply the product separately on each part of the bodywork.
- apply the product one part at a time.
- polish the surface of an individual part off perfectly using a Microfiber towel immediately after you finish application of the product on each part

- after the application wash your car with a Chemical guys car shampoo which does not wash off waxes or sealants.

7. BLITZ ACRYLIC SPRAY SEALANT (Superior Sealant & Wax Booster) - a special shine enhancer of any wax or sealant containing acrylic polymers and components resistant to UV light. It is easy to apply and polish off.

Product Code :WAC_117_16 (16 oz)

Product Code :WAC_117 (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

BLITZ is a new and the best technology formulated on the basis of micro-emulsified acrylic polymers and shine enhancers which creates highly glossy and strong protective barrier. This coat protects the surface of your car from UV light, road dirt and damaging contamination from everyday running with extremely long durability. It prevents water spots and after polishing off repels water from your paint surface perfectly. Raindrops slide off your paint quickly and easily. The product is equipped with an atomizer. In contrast to strenuous and lengthy application of traditional waxes, the application with an atomizer is very easy and quick. This sealant technology is one of the world's greatest innovations in car maintenance. After the application BLITZ penetrates your paint immediately and thanks to its highly reflexive molecules creates high wet-looking shine with extra strong protection in few seconds. It is applicable to all painted surfaces, chromium and metals, as well as wheels, tyres and other glossy surfaces as needed.

APPLICATION:

- spray a small amount of the product on each painted part of your car. Use a Microfiber towel to spread the product in even microscopically thin layer to the whole surface of your paint.
- on horizontal surfaces (bonnet, roof and boot lid) apply the product with a backward-and-forward motion. On vertical surfaces apply the product with a side-to-side motion. Apply the product softly and do not push!
- wait for a while and then polish the whole surface off using a Microfiber towel. Start the final polishing at a place where you first applied the product.

PRODUCT ADVANTAGES:

- it can be used as a stand alone product for enhancing the look of your car after it is washed, with durability for several months.
- it can be used as a quick shine enhancer.
- it prolongs durability of protective coat.
- prolongs longevity of previously applied waxes and acrylic sealants.
- to save time use the product as full-blown sealant.
- minimum consumption, easy application and easy and quick final polishing off. Top final effect - high shine with wet effect.
- there is no product residue on rubber and plastic parts of your car after the application.

8. JETSEAL 109 SUPER ACRYLIC SEALANT FORMULA - a special anti-corrosion sealant on nano technology basis, without abrasive particles. It provides your paint with maximum final shine and long-lasting protection against UV light, salt and aggressive environment. It creates a very glossy and resistant film delivering maximum effect to black and dark paints.

Product Code :WAC_118_16 (16 oz)

Product Code :WAC_118 (1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

JetSeal 109 is a extraordinary anti-corrosion sealant which delivers the finest finish and long-lasting protection to your paint. It provides smooth and shiny finish and protection against the harshest environment elements, such as salt, UV light or acid rain. The product was originally developed for aircraft industry. Using acrylic nano-technology the product bonds to your paint at molecular level and creates resistant, ultra glossy finish with long-lasting durability. It does not contain abrasive components, waxes, teflon or silicones. The ability of molecular

bonding gives the product qualities that can't be achieved by regular formulations. It is applicable to paints and parts of carbon, laminates, fibreglass, polished aluminium, chromium, carbon fibre, alloys and other non-porous materials, including glass. It does not peel, crack or discolour. Apply the product in two layers to reach perfect wide-area coating.

PRODUCT ADVANTAGES:

- perfect ultimate protection against sunlight – UV light and aggressive environment
- shiny wet finish with long-lasting anti-corrosion impregnation
- applicable in layers to reach maximum protection and shiny surface
- suitable for black and dark paints - for maximum shine we recommend that you use 5050 Limited Series polish or Pete's 53 – applicable in layers.
- there is no product residue on rubber and plastic parts of your car after the application.

HAND APPLICATION:

- apply a thin coat of the product on perfectly clean and optimally decontaminated surface
- using a foam applicator or Microfiber towel of quality cotton/microfiber
- we recommend that you use CG applicators.
- on horizontal surfaces (bonnet, roof and boot lid) apply the product with a backward-and-forward motion. On vertical surfaces apply the product with a side-to-side motion.
- apply the product softly and do not push.
- apply the product separately on each part of the bodywork.
- apply the product one part at a time.
- let the product dry for a while
- polish the surface of an individual part off perfectly using a Microfiber towel immediately after you finish application of the product on each part
- after the application wash your car with a Chemical guys car shampoo which does not wash off waxes or sealants.

9. SPEED WIPE SPRAY QUICK SHINE– an antistatic, fully synthetic detailing spray without natural waxes designed to remove road dirt, contaminations, fingerprints and smudges. It delivers high antistatic protection and protection against UV light and prevents your paint from ageing and fading. It is applicable to all glossy materials. High shine with long-lasting impregnation.

Product Code :WAC_202_16 (16 oz)

Product Code :WAC_202(1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre (560g)

Obsah velkého balení - Kanistr (1Galon) – 3,8 Litre

Vintage Speed is a brand new, quick and fully synthetic detailing spray without natural waxes, with high content of shine enhancers and water-based polymers. It quickly and easily removes road dirt and contamination, dust, fingerprints and smudges. It contains effective UV filters which prevent your paint from ageing and fading and highly effective lubricating antistatic components that reduce friction on surface

and settling of dust. It is suitable for all types of cars and trucks and their paints, for motorcycles, ships, planes and helicopters. Just spray the product on the surface and polish it off with a Microfiber towel and you reach perfect cleanness and beautiful wet finish of your paint, any painted surface, chromium, stainless steel, polished aluminium, plastic, wood imitation and also glass. It is very successfully used in showrooms to remove dust and restore shine of displayed cars.

APPLICATION: Spray the product onto the surface and gently remove dirt with a Microfiber towel, then use a dry Microfiber towel to polish it off. The product immediately creates a thin, antistatic, protective coat, resistant to dust and water, which delivers wet shiny finish to any shiny surface of any colour.

PRODUCT ADVANTAGES:

- pleasant cherry scent Chery
- maximally universal product for universal use.
- does not leave smudges and maximally enhances depth and cleanness of shine.
- maximum easy application - just spray the product and wipe off, without difficult polishing off.
- it contains highly effective antistatic lubricating components which reduce friction on surface by 75 % and settling of dust by 50 %. The surface is slick to the touch of your hand.
- It is applicable to painted surfaces, as well as glass, carbon, laminate and chromium.
- it can be diluted up to a ratio of 1:3 when used as a lube with decontamination bar. (For removal of dirt use the product undiluted, for maximum safety).
- there is no product residue on rubber and plastic parts of your car after the application.

10. SS6 SECOND SKIN HYBRID VEHICLE COATING SYSTEM - the only product in the world developed using a patented advanced hybrid technology with high content of secondary polymers which is durable for years, is fully synthetic and protects your paint against UV light, oxidation and dirt. It creates an unbreakable shield which provides long-lasting resistance and mirror-like shine.

Product Code : WAC_224_02 (250g)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser – 250 g

SS6 SECOND SKIN is the only product in the world designed to immediately create protective coat on your paint, using secondary polymers, which delivers unmatched durability and brilliant shine. Within few minutes after application the protective coat bonds to the surface and creates hard coating which protects the surface from UV light, oxidation and contamination. This revolutionary coating bonds to the surface on the nano level and creates a shield which stays resistant and smooth as glass over a long period of time. This patented hybrid technology, used in aircraft industry, resists water, contaminations and UV light and uses a patented Colour Enhancing Technology which enhances any colour shade of any shiny surface. Unmatched protection provided by this only car care product of its kind lasts even for years. It serves as a perfect base for other layers of natural waxes and sealants.

PRODUCT ADVANTAGES:

- long-lasting protection and high shine of your paint.
- advanced hybrid coating with long-lasting protection against UV and IR radiation, road dirt, contamination, moisture and water
- it enhances every paint shade and brightens up every colour to shiny finish.
- the product was developed for aerospace industry in cooperation with a department of long-term protection of surfaces.
- there is no product residue on rubber and plastic parts of your car after the application.

HAND APPLICATION:

- apply a thin coat of the product on perfectly clean and optimally decontaminated surface
- using a foam applicator or Microfiber towel of quality cotton/microfiber
- use only very small amount of the product because its special consistence is very concentrated and effective.
- apply the product softly and do not push.
- apply the product separately on each part of the bodywork.
- apply the product one part at a time
- allow the product to dry for about 20 minutes, apply the second layer in the same way
- polish the surface of an individual part off perfectly using a Microfiber towel immediately after you finish application of the product on each part
- after the application wash your car with a Chemical guys car shampoo which does not wash off waxes.

11. PETE'S 53' – PEARL SIGNATURE PASTE WAX - Liquid Crystal polymer White Carnauba – a unique blend of oils, liquid crystalline polymers and white Brazilian carnauba wax. The wax is specifically designed for long-term impregnation and perfect protection of metallic and dark paints against UV and IR radiation, water stains and dirt. It delivers wet shine finish.

Product Code :WAC_300 (250 g)

EXTERIOR

Regular package – 250 g

The product is designed for car buffs who like working with hand-made natural waxes and demand maximum wet shine finish. The product is made of the best ingredients, such as emulsified almond, coconut, banana and propolis oils, combined with 53 % of white Brazilian carnauba wax. Natural materials create soft and warm shine and perfectly enhance any colour shade of your paint to a brilliant shine. This unique blend of oils and liquid crystalline polymers is specially

developed to enhance shine of dark and metallic paints. Created hydrophobic coat works as a shield which perfectly protects your paint from water stains, UV and IR radiation, road dirt and other contamination that could damage your paint.

PRODUCT ADVANTAGES:

- the wax is specially developed for dark and metallic paints
- an easy and quick application
- it enhances shine of your paint and makes colours brighter, fuller and more radiant.
- it repels water and dirt and is highly resistant to UV light. - there is no product residue on rubber and plastic parts of your car after the application.
- It makes car maintenance much easier.

APPLICATION: Formulation of this special blend enables you to do the final polishing off immediately, without having to wait after the application as with regular products. Rub this timeless wax gently into a foam applicator and apply a thin coat to your paint. Polish it off immediately to a brilliant shine. High content of Brazilian carnauba wax (53 %) perfectly reflects UV rays and protects your paint from fading and getting grey. The special formula is a Chemical Guys' speciality and is handed down from generation to generation.

HAND APPLICATION:

- apply a thin coat of the product on perfectly clean and optimally decontaminated surface of your paint, using a foam applicator or Microfiber towel made of quality cotton/Microfiber
- we recommend that you use CG applicators.
- on horizontal surfaces (bonnet, roof and boot lid) apply the product with a backward-and-forward motion. On vertical surfaces apply the product with a side-to-side motion.
- apply the product softly and do not push.
- apply the product separately on each part of the bodywork.
- apply the product one part at a time.
- polish the surface of an individual part off perfectly using a Microfiber towel immediately after you finish application of the product on each part
- after the application wash your car with a Chemical guys car shampoo which does not wash off waxes.

12. YELLOW PASTE WAX WITH PINA COLADA SMELL XXX - a hand-made natural wax for enthusiasts and buffs who like working with natural waxes and demand a deep wet shine finish. It is applicable in layers. It contains the best white Brazilian wax and yellow carnauba wax. It is quick to apply, enhances the shine to brilliance and brings out the colour of your paint. It does not contain synthetic waxes.

- **Product Code :WAC_301 (250 g)**

EXTERIOR

Regular package – 250 g

The product is designed for car buffs who like working with hand-made natural waxes and demand maximum deep wet-shine finish. It is great for preparation of your car for tuning meetings and other similar events. This hard wax contains 47 % of natural waxes (90 % of the best Brazilian white wax and 10 % of yellow carnauba wax) enriched with synthetic LTI polymers which enable application in 2-3 layers and delivers the deepest wet shine to your car. At the same time they prolong longevity of the protective coat up to several months and maximally improve resistance to elements. If

you want to achieve maximum protection of your paint without using synthetic sealants, you can apply Yellow Paste Wax in 2 or 3 thin layers. If you apply the product in layers, we recommend that you wait at least 20 to 30 minutes before application of the next layer. Depending on the temperature (weather and particular conditions) and your paint surface itself. This professional product has to be applied and used correctly to achieve the desired effect. For even better effect and durability apply a sealant as a base under this wax.

PRODUCT ADVANTAGES:

- the wax is specially designed for one-time application, as well as application in layers.
- an easy and quick application - the product can be applied even in direct sunlight
- it enhances shine of your paint to brilliance and makes colours brighter, fuller and more radiant.
- it repels water and dirt and is highly resistant to UV light. It makes your car maintenance much easier.
- it contains only natural Brazilian and carnauba waxes and LTI polymers, it does not contain any synthetic waxes.
- there is no product residue on rubber and plastic parts of your car after the application.

HAND APPLICATION:

- apply a thin coat of the product on perfectly clean and optimally decontaminated surface
- using a foam applicator or Microfiber towel made of quality cotton/Microfiber
- we recommend that you use CG applicators.
- on horizontal surfaces (bonnet, roof and boot lid) apply the product with a backward-and-forward motion. On vertical surfaces apply the product with a side-to-side motion.
- apply the product softly and do not push.
- apply the product separately on each part of the bodywork.
- apply the product one part at a time
- let the product dry for a while
- if you apply the product in layers, wait between individual applications at least 20 - 30 minutes, depending on the conditions.

- polish the surface of an individual part off perfectly using a Microfiber towel immediately after you finish application of the product on each part
- after the application wash your car with a Chemical guys car shampoo which does not wash off waxes.

13. 5050 LIMITED SERIES CONCOURS PASTE WAX v 2 CHROME - a special polishing wax available in limited series, developed following a special formula. The process of production takes 8 days and the wax is hand-made.

Product Code :WAC_302 (250 g)

EXTERIOR

Regular package – 250 g

The product was formulated on the basis of long-term experience, data and demands of professional connoisseurs, looking to achieve unmatched deep and brilliant shine of your car paint which actively responds to changing light. The quality and technological perfection make 5050 CONTOUR PASTE WAX stand out among similar products available in the world's market. It is available only in limited series and it is hand-made to guarantee the highest quality and to meet the requirements of the process of production. The production itself takes 8 days, including pouring of the product to heat-resistant tins and 24 hours of cooling. Each tin is numbered and signed by a responsible worker. - there is no product residue on rubber and plastic parts of your car after the application.

HAND APPLICATION:

- apply a thin coat of the product on perfectly clean and optimally decontaminated surface
- using a foam applicator or Microfiber towel of quality cotton/microfiber
- we recommend that you use CG applicators.
- on horizontal surfaces (bonnet, roof and boot lid) apply the product with a backward-and-forward motion. On vertical surfaces apply the product with a side-to-side motion.
- apply the product softly and do not push.
- apply the product separately on each part of the bodywork.
- apply the product and polish it off one part at a time.
- let the product dry for a while
- polish the surface of an individual part off perfectly using a Microfiber towel immediately after you finish application of the product on each part
- after the application wash your car with a Chemical guys car shampoo which does not wash off waxes.

14. WHEELS GUARD WHEEL - a special cleaner and wax designed to deliver maximum protection, shine and antistatic protection to all types of wheels - painted, chromium, stainless and even sensitive wheels of polished aluminium.

Product Code :WAC_303 (8 oz) (250g)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package (8 oz)

Wheels Guard is a special ionic, antistatic product designed for cleaning, polishing and maximum protection of all types of wheels - painted, chromium, stainless and even sensitive wheels of polished aluminium. It contains microscopic synthetic cleaning balls that wrap particles of dust, dirt and other contaminations and lifts them up away from the surface. High content of acrylic lubes which reduce friction prevent the surface from being scratched. Using a Microfiber towel you can decontaminate the wheel surface and polish it off easily and safely.

This technology enables to quickly remove the oxidations and resistant and ingrained dirt from wheels. All treated surfaces are provided with maximum wet shine and long-lasting impregnation and protection against brake dust, asphalt and other contaminations. It contains antistatic components that reduce contamination of wheels. Treated wheels are extremely easy to clean and high water-resistance makes their drying much easier and minimizes formation of water stains caused by hard water. The product maximally prolongs longevity of your wheels' surfaces. After the application wash your car with a Chemical Guys car shampoo which does not wash off waxes.

15. CELESTE DETTAGLIO – CARNAUBA PASTE WAX – a premium carnauba wax developed to maximally enhance look and effect of all sports, tuning and other extraordinary cars. It brings out all shades of paint and makes them crystal clear.

Product Code :N_00P6 (8 oz) (250g)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package (8 oz) – (250 g)

A unique blend of premium-class pure carnauba wax which contains 6-times refined white grade A carnauba wax enriched with the purest natural oils. It is designed to bring out all colour shades when being watched from different angles and under different light conditions. In bright sun the colour of your car is transformed into crystal-clear shine. This new generation of carnauba waxes and natural oils is more resistant and durable than similar products available in the world's market. The product withstands comparison to other, many times more expensive carnauba waxes by world-class luxurious brands.

HAND APPLICATION:

- apply a thin coat of the product on perfectly clean and optimally decontaminated surface
- using a foam applicator or Microfiber towel made of quality cotton/Microfiber
- we recommend that you use CG applicators.
- on horizontal surfaces (bonnet, roof and boot lid) apply the product with a backward-and-forward motion. On vertical surfaces apply the product with a side-to-side motion
- apply the product softly and do not push.

- apply the product separately on each part of the bodywork.
- apply the product and polish it off one part at a time.
- let the product dry for a while
- polish the surface of an individual part off perfectly using a Microfiber towel immediately after you finish application of the product on each part
- there is no product residue on rubber and plastic parts of your car after the application.
- after the application wash your car with a Chemical guys car shampoo which does not wash off waxes.

16. BLACK – SIGNATURE PASTE WAX SINGLE JAR– a premium carnauba wax developed to maximally enhance look and effect of all black and dark sports, tuning and other extraordinary cars.

Product Code :WAC_307(8 oz) (250g)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package (8 oz) – (250g)

The Black wax is specially designed to enhance the depth and shine of black paints and to take the shine to the highest level of perfection. A unique cold process of production enables to keep protective super polymers in their strongest molecular condition in which they ensure maximum resistance to UV light and repel dirt from air and water, as well as road dirt. This unique wax uses synthetic polymers which bond perfectly to the surface and create a lasting protective shield. Protection of

black and dark paint colours is very important. If they are exposed to hard UV light for a long period of time, ultra black molecules of black paint fade due to light reflection and paint gets matte. Polymers which bond to the surface of your paint create a protective, water-resistant coat and make cleaning of your car quicker and easier. Water easily slides off from the surface which reduces the time of drying and prevents formation of water stains. Black is designed for quick and easy hand application, as well as machine application.

ADVANTAGES OF THIS PERFECT PRODUCT:

- quick and easy application
- after the application the wax reacts with air and becomes hard and forms maximally resilient protective coat. After it becomes solid the wax can withstand up to 150 degrees Celsius and creates a rich reserve for the summertime.
- it repels water and dirt and is highly resistant to UV light. It makes your car maintenance much easier.
- extreme longevity up to 1 year.
- there is no product residue on rubber and plastic parts of your car after the application.

HAND APPLICATION:

- apply a thin coat of the product on perfectly clean and optimally decontaminated surface of your paint, using a foam applicator or Microfiber towel made of quality cotton/Microfiber
- we recommend that you use CG applicators.
 - on horizontal surfaces (bonnet, roof and boot lid) apply the product with a

backward-and-forward motion. On vertical surfaces apply the product with a side-to-side motion

- apply the product softly and do not push.
- apply the product separately on each part of the bodywork.
- apply the product and polish it off one part at a time.
- let the product dry for a while
- polish the surface of an individual part off perfectly using a Microfiber towel immediately after you finish application of the product on each part
- after the application wash your car with a Chemical guys car shampoo which does not wash off waxes.

17. LAVA – LUMINOUS GLOW INFUSION - dazzling shine spectrum - a specially developed wax to maximally enhance the depth and highlight any colour shade of your paint. All that with maximum resistance to extreme weather conditions and an orange scent.

Product Code :WAC_310(8 oz) (250g)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package (8 oz) – Litre

Lava is the newest product in colour protection and paint colour enhancement technologies. Designed and developed to bring out every colour shade of your paint. Lava brightens up every paint shade into new radiant shades. Red paint becomes more radiant, yellow paint becomes deeper and blue gains sky-blue shade. White and silver paints gain astonishing wet shine and depth. It is a real pleasure to apply the wax and a real delight to watch the colours shine after the paint is polished off. The Lava products are designed to withstand all extreme environmental conditions and to ensure maximum protection of your paintwork. They also repel water which quickly flows down from the bodywork. Once applied the wax reacts with air and becomes hard and forms a maximally resilient protective coat. Due to a high melting temperature the product withstands extreme temperatures up to 150 degrees Celsius providing a rich reserve even to a paintwork, hot from the summer sun, without its molecular structure being changed and any of its qualities being lost. Luminous Glow Infusion takes the quality and brightness of colours into a new dimension.

ADVANTAGES OF THIS PERFECT PRODUCT:

- quick and easy application
- after the application the wax reacts with air and becomes hard and forms a maximally resilient protective coat. After it becomes solid the wax can withstand up to 150 degrees Celsius and creates a rich reserve for the summertime.
- enhances paint colours to a new dimension. Colour shades are brighter, fuller and more radiant.
- nano technology and synthetic formula guarantee that the product bonds to the paint surface and creates an ultra smooth coat
- it repels water and dirt and is highly resistant to UV rays. It makes your car maintenance much easier.
- there is no product residue on rubber and plastic parts of your car after the application.

HAND APPLICATION:

- apply a thin coat of the product on perfectly clean and optimally decontaminated surface of your paint, using a foam applicator or Microfiber towel made of quality cotton/Microfiber
- we recommend that you use CG applicators.
 - on horizontal surfaces (bonnet, roof and boot lid) apply the product with a backward-and-forward motion. On vertical surfaces apply the product with a side-to-side motion.
- apply the product softly and do not push.
- apply the product separately on each part of the bodywork.
- apply the product and polish it off one part at a time.
- let the product dry for a while
- polish the surface of an individual part off perfectly using a Microfiber towel immediately after you finish application of the product on each part
- after the application wash your car with a Chemical guys car shampoo which does not wash off waxes.

18. ECOSMART – WATERLESS DETAILING SYSTEM - 100% HYPER CONCENTRATE - a unique product designed for washing your cars, motorcycles and other surfaces without use of water. Great for cleaning without any water available or when drainage isn't connected to particular sewage disposal plant (ECOLOGY).

Product Code :**WAC_707**(1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Big package can (1Galon) – 3,8 Litre

ECOSMART is the world's first detailing product of its kind that enables to wash your car, motorcycle and other surfaces without water. The product is developed to safely remove dirt and contaminations away from the surface without damaging or scratching the painted surface (dry washing). This Smart Chemistry uses a method of spraying and wiping off on any surface - parts of a car, including glass, wheels, plastics, engine compartments, undercarriages and metal surfaces. It is a unique blend of hyper-surfactants, Brazilian carnauba wax and gentle lubricating agents. Once sprayed onto the surface it lifts and emulsifies dirt away from the surface and wrap it with lubricants and additives which prevents the surface from being scratched. Afterwards you can remove the dirt easily using a special Microfiber towel and given technology of wiping off. Lubricating agents enable the towel to lightly slide over and decontaminate the surface at the same time, giving your paintwork a perfect look and brilliant shine, as well as long-lasting impregnation. ECOSMART safely removes dust and light contamination, as well as mud and ingrained dirt. ECOSMART is 100 % concentrate - the minimum dilution ratio is 1:8 (1 part product and 8 parts water). You can dilute the product more as needed. We recommend that you use drinking water from water tap. The product is biodegradable and pH neutral.

The product ranks among the world's best products of its kind in given category. This product for waterless washing is the whole detailing system which washes, decontaminates, waxes and polishes through wiping.

QUALITIES OF THIS REVOLUTIONARY PRODUCT:

- it is a cleaning (washing) and a polishing (wax + sealant) product in one
- it dissolves and emulsifies (wraps) contamination, **lubricates the surface** and ensures safe application and great results without damaging your paint
- kaolin suspension which is contained in the product removes calcium deposit marks and other contaminations.
- it leaves a protective coat of synthetic and carnauba wax blend and provides effective protection against UV light.
- it leaves a perfect shine comparable to the best waxes.
- treated surface has very good hydrofobic qualities (water drainage).
- it contains strong antistatic components that reduce settling of dust on the surface of your bodywork.
- non-toxic, biodegradable, with a pleasant scent.
- applicable to any non-absorbent material - paint, glass, chromium, wheels, plastics and rubber. All these surfaces are cleaned and impregnated with long-lasting protection.
- there is no product residue on rubber and plastic parts of your car after the application.

EXCLUSIVE ADVANTAGES OF THE PRODUCT:

- **its primary advantage** - the product can be used "**anywhere and anytime**".
- the perfect technology for **quick "washing" of a car with light contamination** (once a week) in a garage or in a parking lot
- the product can be part of your compulsory equipment, so you can use it together with a quality Microfiber towel **on every journey, anywhere and anytime.**
- -an ideal product **for acute removal of insects** from otherwise clean car immediately after your journey. The product is extremely effective for this use. It is also ideal for cleaning dried and resilient insects residue after regular washing of your car. In contrast to special insect removers the product does not need to be washed off, isn't aggressive and does not wash off protective wax coat!
- also ideal for **cleaning of door jambs** after regular washing of your car and all surfaces in **engine compartment**. Even these surfaces gain perfect shine and protection.

It is the number one product for motorcyclists and their jewels!

DIRECTIONS:

- **dilute** ECOSMART Concentrate before use **with distilled water in a ration of 1:7** and shake it thoroughly!!
- you get **30,4 l of ready-to-use product** out of one package (1 Galon).
- it is not recommended to dilute at once more product than you currently need.
- spray the product directly onto contaminated surface from the top downwards and allow it to work and penetrate layers of contamination. Then wipe the dirt away using a Microfiber towel. After wiping away the rough dirt with a Microfiber towel, turn the towel to its clean parts and repeat the process depending on the degree of contamination. Start the wiping away from roof and continue downwards, one part of the bodywork at a time. Leave front bumper, rear bumper, wheel wells and doorsills until last.
- we recommend that you use a Microfiber towel of high quality, optimally one with long strand. It is ideal to use a Chemical Guys product. Always fold a Microfiber towel in fourths. This way you get eight clean work surfaces out of one towel

- when cleaning small areas (door jambs and engine compartments) the product can be applied directly onto a towel.
- finally wipe the surface till dry and polish it off with a clean Microfiber towel. Don't let the product dry.

WARNING:

- if the surface is heavily contaminated, allow the product to work for a while and repeat the spraying once more.
- - remember to check contamination of your towel during the wiping and turn it around in time
- always follow the given procedure of wiping the product off, otherwise your paint could get damaged!!!

19. ECOSMART RU – WATERLESS DETAILING SYSTEM– READY TO USE - a unique product for washing of your cars, motorcycles and other surfaces without use of water. Great for cleaning without any water available or when drainage isn't connected to particular sewage disposal plant ECOLOGY)

Product Code :WAC_707RU_16 (16 oz) (560g)

Product Code :WAC_707RU(1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

ECOSMART RU - this concentrate diluted in a ratio required by the producer is the world's first detailing product of its kind that enables to wash your car, motorcycle and other surfaces without water. The product is developed to safely remove dirt and contaminations away from the surface without damaging or scratching the painted surface (dry washing). This Smart Chemistry uses a method of spraying and wiping off on any surface - parts of a car, including glass, wheels, plastics,

engine compartments, undercarriages and metal surfaces. It is a unique blend of hyper-surfactants, Brazilian carnauba wax and gentle lubricating agents. Once sprayed onto surface

it lifts and emulsifies dirt away from the surface and wraps the dirt with lubricants and additives which prevents the surface from being scratched. Then you can remove the dirt easily using a special

- remember to check contamination of your towel during the wiping off and turn it around in time
- always follow the given procedure of wiping the product off, otherwise your paint could get damaged!!!

20. HYBRID V7 – OPTICAL SELECT - High Gloss Spray Sealant & Detailer – a special lube of a new generation that immediately creates high shine with long-lasting protection against UV light, designed to remove fingerprints, water stains and road dirt. It is formulated with a special nano technology that bonds to any surface immediately. It is specialized on maximum shine and long-lasting protection. Lubricating and cleaning effects are secondary.

Product Code :WAC_808_16 (16 oz) (560g)

Product Code :WAC_808(1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

HybridV7 is a lube that contains transparent synthetic advanced polymers which immediately deliver high shine with long-lasting protection against UV light, designed to remove fingerprints, dust, dirt, road contamination and water stains within seconds. Hybrid V7 is a product of a new generation, the world's first hybrid nano-polish on the basis of a sealant, formulated with nano-technology which immediately bonds to any surface - paint, glass, plastics, rubber, rims, exhaust

pipes and headlights. It perfectly cleans your paint (or other treated surface) and quickly creates highly transparent, deep shine finish with maximum protection on every treated surface. It works as a combination of a detailing spray and a sealant, in one.

APPLICATION: The product is as easy to apply as a detailing spray - instead of regular procedure (applying, allowing the product to work and polishing off) just spray Hybrid V7 onto your paint and wipe it off till dry. The product immediately delivers maximum shine to any surface! This easy application provides your car with first-class shine, perfect drainage of water from its surface and perfect protection in few minutes. In contrast to universal detailing sprays the product loses its ability to clean and lubricate, for the purpose of achieving maximum shine and protection durability. That's why the product is very suitable as finishing product designed to maximize shine, as well as to maintain and refresh existing protective coat of any wax, taking its look to a higher level. There is no product residue on rubber and plastic parts of your car after the application.

21. Meticulous Matte Detailer & Spray Sealant (16 oz) – a special product with an atomizer for cleaning, polishing and long-lasting impregnation of matte paints, other matte surfaces and matte vinyl car wraps attached to a vehicle's bodywork. It contains UV light absorbers.

Product Code : **SPI_995_16** (16oz)

Product Code : **SPI_995** (1Gal

EXTERIOR / INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

Matte Detailer Spray is the first spray designed for preserving all matte paints, matte surfaces and matte vinyl car wraps, with highly effective UV protection coating. It easily removes dust, water stains and fingerprints from matte paints or car wraps in seconds. It impregnates the surface, repels dirt and road dirt and contained unique UV light absorbers deliver a long-lasting protection against untimely ageing. It contains unique silicon and wax which

maintain and protect the surface of matte paints without changing its matte look.

APPLICATION:

Wash a vehicle with matte paint or matte car wrap carefully using a special car shampoo for matte paints, **CWS 995 16** - Meticulous Matte Auto Wash, and remove water residue from its surface using a Microfiber towel **MIC 721 01** - Miracle Dryer Absorber. After the surface is prepared in this way spray small amount of the product on it and polish it off using the Miracle Dryer Absorber Microfiber towel - **MIC 502 01** to reach velvet matte shine. For local stains repeat the process until the stains are removed completely.

PRODUCT ADVANTAGES:

- the only product for matte paints, surfaces and car wraps in the world
- it easily and quickly removes dust, grease, road dirt, fingerprints and bird droppings
- when applied, it creates satin shine with matte effect
- it can be used as a base for waxes and sealants
- it impregnates for a long time and protects the surface from untimely ageing caused by UV light effect

MICROFIBER TOWELS, APPLICATORS AND ACCESSORIES

1. ULTRA FINE 100% MICROFIBER TOWEL PINK 15"x15" (38cm x 38cm) - a special universal pink Microfiber towel designed for drying, polishing, products application and other detailing work.

ProductCode: MIC_101_01 (1 Ps)

These special, pink, universal Microfiber towels are gentle, yet of very good quality. They are especially great for cleaning, polishing, drying, products application and other detailing work. They are designed for impregnating, polishing, paint drying and wheels and windows cleaning. They are available in 38 cm x 38 cm size and are made of a special, super absorbent material containing 30.000 hollow fibres per each square centimeter. There are no stripes on the surface, they do not loosen threads and their composition is unparalleled - 70% polyester / 30% polyamide. They attract

dust and microparticles as magnets. They easily absorb seven times their weight in water. They are very good for cleaning of ceiling upholstery and textile and leather seats.

WARNING – as on any other microfiber product, do not use softeners. Softeners reduce antistatic qualities, cause the towel to clean less effectively and harden the fibers. They can be dried in a tumble-dryer on low temperature, separately from other laundry. The use of the Cleaning Microfiber detergent (CWS_201_16) is recommended.

2. ULTRA FINE 100% MICROFIBER TOWEL BLUE 15"x15" (38cm x 38 cm) – a special universal blue Microfiber towel designed for drying, polishing, products application and other detailing work.

ProductCode: MIC_102_01 (1 Ps)

These special universal Microfiber towels are available in blue and yellow. Each colour is used for different detailing work. They are gentle, yet of very good quality. They are used for cleaning, polishing, drying, product application and other detailing work. They are primarily designed for impregnating, polishing, paint drying and car wheels and windows cleaning. They are available in 38 cm x 38 cm size and are made of a special, super absorbent material containing 30.000 hollow fibres per

each square centimeter. There are no stripes on the surface, they do not loosen threads and their composition is unparalleled - 70% polyester / 30% polyamide. They attract dust and microparticles as magnets. They easily absorb seven times their weight in water. They are very good for cleaning of ceiling upholstery and textile and leather seats.

WARNING – as on any other microfiber product, do not use softeners. Softeners reduce antistatic qualities, cause the towel to clean less effectively and harden the fibers. They can be dried in a tumble-dryer on low temperature, separately from other laundry. The use of the Cleaning Microfiber detergent (CWS_201_16) is recommended.

3. MICROFIBER APPLICATORS PREMIUM GRADE BLUE 2"x4"x6" – a special blue sponge (pad) for perfect and effective application of impregnating and polishing products.

ProductCode: MIC_292_01 (1 Ps)

These special blue sponges (pads) wrapped in 100% Microfiber (70% polyester and 30% polyamide) are ideal for applying of waxes and polishing and impregnating products to any part of your car. They are made of a special material containing 30.000 hollow fibres per square centimetre. The pad case is gentle, firm, highly absorbent and prevents the pad from soaking. The applicator pad effectively improves products application enabling their even spreading on the surface, resulting in maximum coverage while using less product, and protects the treated surface from possible scratching. It works with only 0,1% loss. The pads, same as Microfiber towels, can be washed separately in a washing machine, rinsed or washed with Cleaning Microfiber detergent (CWS_201_16). **WARNING** - as on any other microfiber product, do not use softeners. Softeners reduce antistatic qualities, cause the pad to clean less effectively and harden the fibers. They can be dried in a tumble-dryer on low temperature, separately from other laundry.

4.MIRACLE DRYER ABSORBER PREMIUM MICROFIBER TOWEL

ORANGEBlack Microbanding (16" x16") 40cm x 40cm (1 Ps)- a special hemmed 100% microfiber towel for quick drying and polishing of your car body and other treated surfaces.

ProductCode : MIC502_01

This special hemmed 100% microfiber towel is used for quick drying and polishing of your car body. Its fibers are able to absorb up to 10 times its weight in water. Its special reversible construction is made, using a brand new technology, of a new generation of microfibers - 70% polyester and 30% polyamide. Even after hundreds of washing it remains soft and absorbent of water and waxes. It does not loosen threads and the material thickness guarantees quick absorption of liquids and polishing without any surface scratching. It is positively charged and attracts dust as a magnet. This extra strong and soft towel is available in 40cm x 40cm size and is designed for polishing away wax residue to a perfect shine. It has 60.000 hollow fibres per 1 square centimetre. The second variant of the Miracle Dryer (MIC 602 03), available in 60 cm x 90cm size, is suitable for drying of your car paint after washing and also for final polishing of the whole bodywork after all the applications are finished. It has 80.000 hollow fibres per 1 square centimeter. These towels have long fibres on one side and short fibres on the other. Long fibres are great for application of polishes, while short fibres are ideal for polishing of plastics and wax residue and cleaning and polishing of windows with the WINDOW CLEAN product. These towels are elastic, silky soft and do not crease. They can be renovated and washed with the special Cleaning Microfiber product (CWS_201_16).

WARNING - as on any other microfiber product, do not use softeners. Softeners reduce antistatic qualities, cause the towel to clean less effectively and harden the fibers. They can be dried in a tumble-dryer on low temperature, separately from other laundry.

5. MIRACLE DRYER ABSORBER PREMIUM MICROFIBER TOWEL

ORANGE Black Microbanding(25" x 17") 60cm x 90cm (1 Ps)- a special, hemmed 100% microfiber towel for perfect drying and overall polishing of your car body and other treated surfaces.

ProductCode : MIC721_01

This special hemmed 100% microfiber towel is used for quick drying and polishing of your car body. Its fibers are able to absorb up to 10 times its weight in water. Its special reversible construction is made, by a brand new technology, of a new generation of microfibers - 70% polyester and 30% polyamide. Even after hundreds of washing it remains soft and absorbent of water and waxes. It does not loosen threads and the material thickness guarantees quick absorption of liquids and polishing without any surface scratching. It is positively charged and attracts dust as a magnet. This extra strong and soft towel is available in 60cm x 90cm size. It has 80.000 hollow fibres per 1 square centimetre. The Miracle Dryer is suitable for drying your car paint after washing and also for final polishing of the whole body after all the applications are finished. They have long fibres on one side and short fibres on the other. The long fibres are great for application of polishes, while the short fibres are ideal for polishing of plastics and wax residue and cleaning and polishing of windows with the WINDOW CLEAN product. These towels are elastic, silky soft and do not crease. They can be renovated and washed with the special Cleaning Microfiber product (CWS_201_16).

WARNING - as on any other microfiber product, do not use softeners. Softeners reduce antistatic qualities, cause the towel to clean less effectively and harden the fibers. They can be dried in a tumble-dryer on low temperature, separately from other laundry.

7. THE GRIPPER APPLICATOR SYSTEM W / 3 - PACK5"- an applicator with three pads of microfiber, with plastic handle for a firm grip and Velcro for an easy pads attaching.

ProductCode: ACC_2004

This special product – handle is made of a very resistant aerospace material which won't break or grow older due to the effect of IR + UV light. The handle is ergonomically shaped which enables a comfortable grip and prevents pain in your fingers and palm caused by tiredness during long working. Its construction enables to attach one of the three round white pads with Velcro. These are made of a hardened foam material and covered in a cotton microfiber material. It has 50.000 hollow fibers per 1 square centimeter. Special microfiber pad case is gentle, firm and highly absorbent and it prevents the pads from soaking. The Gripper Applicator is used for applying of polishing and impregnating products on your car paint, glass, wheels, tyres and other parts of your car. The special shape of a handle and the perfect round elastic shape of the pads protect your fingers and nails from grease and dirt. It considerably cuts down the usage of microfiber towels and cloths. It enables repeated application with the same precision and the same amount of the product. For desired shine just polish the applied product with a microfiber towel. Wash the pads the same way as microfiber towels using the Clean Microfiber detergent (CWS_201_16).

8. CONTOUR EZ - FORM APPLICATOR TIRES & TRIM FORMS APPLICATION(1 PACK - 3 Ps) – a special handle with a sponge for applying impregnation on tyres, bumpers and plastics.

ProductCode: ACC_2001

This handle with an application sponge is a great accessory for an easy, precise, economical and clean application of impregnations, dressings and gels onto exterior plastics, tyres and car interiors. Ergonomically shaped rectangular handle, made of a resistant aerospace material, never breaks or becomes brittle and its grooves eliminate slipping out of your hand. Its unique shape enables firm, precise and effective grip during product application on a treated surface. A soft part of the applicator is made of a special „DuraFoam“ foam which prevents the liquid from dripping, evenly doses the product on the whole surface with an unparalleled precision and without product waste. Ergonomical shape of the handle and perfect surface of the sponge protect your fingers and nails from grease and dirt and cuts down the usage of microfiber towels and sponges. Always put the applicator down with the sponge upwards after the application because it stores the impregnation residue.

9.WAX+ DRESSING APPLICATORS W-APS / UFO(1 Ps) – a special, round, red, foam pad for application of sealants, waxes and impregnations.

ProductCode: ACC_113_01

This special round red pad is used for application of polishing and impregnating products on tyres, interior and exterior plastics, bumpers, bodywork paint, leather, fabrics and carpets. This applicator is great for application and cleaning procedures on all kinds of smooth surfaces. It is made of a special „DuraFoam“ foam which prevents the liquid from dripping, evenly doses the product on the whole surface with an unparalleled precision and without product waste. The perfect shape and surface of the pad protect your fingers and nails from grease and dirt. It cuts down the usage of microfiber towels and cloths. It enables repeated application with the same precision and the same amount of the product. It is suitable for impregnating of leather seats. The application and reaching desired effect is very easy, quick and effortless. The pad is washable in a washing machine in a same way as microfiber towels using the Cleaning Microfiber detergent (CWS_201_16).

TVD – CLEANERS FOR PLASTICS, VINYL, RUBBER SEALS AND TIRES + DRESSINGS AND IMPREGNATIONS

1. NEW CAR SHINE PREMIUM- Interior/Exterior Shine Dressing – a spray product with a new car scent for treatment of plastics, vinyls, rubber carpets and plastic cases in luggage compartments. It creates non-greasy, dark satin surface with long-lasting durability. It prevents the surface from aging and contains barriers which protect the surface against UV and IR radiation.

ProductCode: **TVD_102_16** (16 oz)

ProductCode: **TVD_102** (1 Gal)

EXTERIOR + INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

The product is specifically designed to treat tires and vinyl, rubber and plastic parts of your car in both interior and exterior. It creates non-greasy dark satin surface because it does not contain silicones or fats. It slows down colour fading and restores original colours of plastics. The product repels dust and small particles. When regularly used it prevents the surface from premature aging and cracking, and it contains barriers which perfectly protect the surface against UV and IR radiation. Shine Dressing easily maintains original condition

of materials and it keeps the surface ideally smooth for a long time. It has a fresh NEW CAR scent and is suitable for all types of rubber and plastic surfaces. In your car interior it can be used on dashboards, consols, control panels, door paddings, moldings and seals. It is ideal for treatment of outdoor plastics, for protection of bumpers, rear-view mirrors, tires and window and vinyl roofs seals. This „intelligent bandage“ works as a protection and its application and polishing is very easy.

APPLICATION: spray small amount of the product evenly directly onto the treated surface or wipe it on with Microfiber towel or UFO application pad and wipe it dry with MF Fluffer, El Gordo or Monster Microfiber towel. You can control the level of shine by lowering intensity of wiping the surface down after the application. Highly polluted parts need to be perfectly cleaned prior to New Car Shine application, using CG – All Purpose Cleaner or CG - Nonsense. The product delivers natural dark satin shine. The treated surfaces literally shine and are as new. The easy application can be done in both high and low temperatures, even in direct sunlight. If needed repeat the process for bigger shine and protection. It is recommended that you use the CONTOUR EZ - FORM APPLICATOR ACC_2001 for application on tires. This product makes work much easier and more effective.

PRODUCT ADVANTAGES:

- it restores original colours and condition of plastics, rubber and vinyls
- it prevents surfaces from premature aging due to the effect of UV and IR radiation
- an easy application and polishing
- it delivers dark satin shine and treated surfaces are as new
- it is antistatic and repels dust and dirt
- it can be applied in both high and low temperatures, even in direct sunlight
- the application does not change colours of surfaces and leaves no stains or smudges.

2. UNDERCARRIAGE SPRAY - BARE BONES – a special detailing spray for wheel wells and undercarriages. It instantly delivers dark wet looking shine, impregnates for a long time and restores dark black colour of all undercarriage parts. It unifies colours and perfectly hides stains and other imperfections. It repels dirt and protects the surface from dirt. The application delivers a long-lasting pleasant and sharp scent.

ProductCode: **TVD_104_16** (16 oz)

ProductCode: **TVD_104** (1 Gal)

EXTERIOR + INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

Treating your undercarriage and wheel wells is as important as decontamination and polishing of the bodywork. Frames, springs, subframes, fender wells and all other black or grey under car parts need treatment and long-term impregnation. Bare Bones detailing spray is great not only for your undercarriage and under car parts, it also treats and keeps tires, hard black plastics and bumpers and upholstery covers nice and dark black. At the same time the applied layer of the product perfectly

protects impregnated parts against elements, environmental impacts and dirt ingraining and repels road dirt. The product delivers uniting dark black look without dirty stains or smudges.

APPLICATION:

Remove rough dirt from your undercarriage, clean it with pressure washer and allow it to dry. Spray the Bare Bones product on the parts that need to be treated. All the other work does the product itself.

PRODUCT ADVANTAGES:

- it cleans, impregnates and delivers black, radiant shine in few seconds
- it unites colour shades of undercarriage and wheel wells
- it is universally applicable to all parts of your undercarriage, wheel wells, hard plastics and upholstery – it protects the surface against weather conditions and UV light
- it prevents surfaces from getting dirty and repels dirt
- an easy and quick way to enhance your undercarriage and other car parts looks
- ideal for wheel wells, frames, springs, tires and other parts
- a very easy application that can be carried out in both high and low temperatures, even in direct sunlight
- it unites colours of treated surfaces which are left without stains and smudges

3. LIQUID EXTREME SHINE – OIL BASED DRESSING – a special oil-based product with a spray designed to revive and impregnate plastics, vinyls, tires, rubber carpets, plastic bumpers, grilles and moldings in both exterior and interior. It creates dry, non-greasy, dark satin coat with long-lasting durability and pleasant and unobtrusive coconut scent. The dressing prevents the surface from aging and its “ozone filter” protects it against IR and UV radiation.

ProductCode: **TVD_105_16** (16 oz)

ProductCode: **TVD_105** (1 Gal)

EXTERIOR + INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

This multifunctional liquid dressing with a spray revives plastics in both interior and exterior, **provides their in-depth nourishment** and protects them from aging, cracking, getting matte and from pigment loss. It enhances richness of colours and provides natural dark satin shine to treated surfaces. It does not leave an oily film and protects the surface from dirt. It contains special polymers which perfectly bind to the surface and repel dirt, as well as patented technology of UV light absorbers. These particles break deeply into the surface, close pores and act as a protective barrier against harmful UV light which causes premature aging, cracking, fading, getting matte or peeling. They prevent road dirt from getting ingrained and perfectly repel dirt and water. Treated surfaces are very resistant and easy to clean and wash with car shampoo. Liquid Extreme Shine is suitable for impregnation of plastics and hoses in engine compartment, bottom plastic moldings and diffusers, plastic mask grilles, bumpers grilles, grilles around fog lights, which are very hard to clean and impregnate due to their jaggedness, bumpers and mud flaps. In interiors it is great for dashboards and panels, door panels, window rubbers and door seals. It prevents rubber seals from creaking and getting frozen to doors.

PRODUCT ADVANTAGES:

- -regularly treated parts look better than new ones and never age!
- -the product is highly viscous, contains silicons and provides natural and lasting shine to rubber, plastics and vinyls
- it is quick to apply, easy to spread and rejuvenates and restores all black plastic surfaces
- it provides long-lasting protection against harmful UV + IR radiation and repels water
- treated surfaces are not oily and sticky. It does not attract dust or dirt.
- further treatment of already treated surfaces is very easy – just wipe them with a Microfiber towel
- the product can be applied in both high and low temperatures, even in direct sunlight
- it unites colours of treated surfaces which are left without stains or smudges

APPLICATION:

- clean the surface with the NONSENSE or GREENCLEAN product first
- spray the product onto Microfiber towel or applicator and wipe it on the surface

- for bigger areas you can apply the product directly onto the surface and spread it with Microfiber towel
- allow the applied product to soak for about 3-5 minutes, then wipe the surface with dry Microfiber towel, MF Fluffer, El Gordo or Monster Microfiber towel.
- it is recommended that you use the CONTOUR EZ - FORM APPLICATOR ACC_2001 for application on tires. This product makes your work much easier and more effective.

4. EXTREME V.R.T. DRESSING SUPER SHINE – a universal product with cream consistence for rejuvenation and impregnation of plastics, vinyls, tires, rubber carpets, plastic bumpers, grilles and moldings in both interior and exterior. It creates dry, non-greasy, dark satin surface with long-lasting durability and pleasant and unobtrusive coconut scent. Extreme Dressing perfectly prevents the surface from aging and its „ozone filter“ protects it against IR and UV radiation.

ProductCode :TVD_107_16 (16 oz)

ProductCode :TVD_107 (1 Gal)

EXTERIOR + EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

This creamy dressing for rejuvenation of plastics in both interior and exterior provides their in-depth nourishment and protects them from aging, cracking, getting matte or brittle and from pigment loss. It enhances richness of colours and provides natural dark satin shine to treated surfaces. It does not leave an oily film, leaves the surface dry to touch and protects it from dirt. It contains special polymers which perfectly bind to the surface and repel dirt, as well as

patented technology of UV light absorbers. These particles break deeply into the surface, close pores and act as a protective barrier against harmful UV light which causes premature aging, cracking, fading, getting matte or peeling. They prevent road dirt from getting ingrained and perfectly repel dirt and water. Treated surfaces are very resistant and easy to clean and wash with car shampoos. Extreme V.R.T. Dressing is suitable for impregnation of plastics and hoses in engine compartments, bottom plastic moldings and diffusers, plastic mask grilles, bumper grilles, grilles around fog lights, bumpers and mud flaps. In interiors it is great for dashboards and panels, door panels, artificial leather seat covers, window rubbers and door seals. It prevents rubber seals from creaking and getting frozen to doors. It is recommended that you use the CONTOUR EZ - FORM APPLICATOR ACC_2001 for application on tires. This product makes your work much easier and more effective.

PRODUCT ADVANTAGES:

- regularly treated parts look better than new ones and never age!
- *thick creamy consistence guarantees a clean, easy and economical application*
- the consumption of this gel is one-quarter in comparison to liquid products in sprays.
- the product is highly viscous, contains silicons and provides natural and lasting shine to rubber, plastics and vinyls
- it is quick to apply, easy to spread and rejuvenates and restores all black plastic surfaces

- it provides long-lasting protection against harmful UV + IR radiation and repels water
- it has dry effect – the treated surface is not oily and sticky. It does not attract dust or dirt.
- further treatment of already treated surfaces is very easy – just wipe them with a Microfiber towel
- the product can be applied in both high and low temperatures, even in direct sunlight
- -it unites colours of treated surfaces which are left without stains or smudges.

APPLICATION:

- clean the surface with the NONSENSE or GREENCLEAN product first
- apply this creamy product with Microfiber towel or applicator and wipe it on the surface
- allow the applied product to soak for about 3-5 minutes, then wipe the surface with dry Microfiber towel, MF Fluffer, El Gordo or Monster Microfiber towel.

5.GEL EXTENDED LIFE NEW LOOK TRIM + TIRE – a new, water-proof gel with copolymers which restores the original look and colours of faded bumpers, protective and window moldings, grilles, rubber seals, tires and other plastic or rubber parts in both interior and exterior. It protects them from dirt, detergents and aging due to the effect of weather conditions and IR and UV radiation. It is also suitable for rubber and plastic parts of engine compartments.

ProductCode :TVD_108_16 (16 oz)

ProductCode :TVD_108 (1 Gal)

EXTERIOR + INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

This special gel is great for tires, rubber seals, plastic panels in doors, handles and other car parts made of these materials. This unique technology containing copolymers quickly breaks into the structure of dehydrated and faded surface, perfectly impregnates it and repels water, dust and dirt. The gel quickly restores the look of faded tires, upholstery, bumpers, rear-view mirrors, window and door seals, protective and window moldings and front mask grilles and protects them from

detergents, dirt and aging due to the effect of weather conditions and IR and UV radiation. It is suitable for rubber and plastic parts of engine compartments. It is recommended that you use the CONTOUR EZ - FORM APPLICATOR ACC_2001 for application on tires. This product makes your work much easier and more effective.

PRODUCT ADVANTAGES:

- regularly treated parts look better than new ones and never age!
- *thick creamy consistence guarantees a clean, easy, precise and economical application*
- the consumption of this gel is one-quarter in comparison to liquid products in sprays
- the product is highly viscous, contains silicons and provides natural and lasting shine to rubber, plastics and vinyls

- it is quick to apply, easy to spread and rejuvenates and restores all black plastic surfaces
- its unique water-proof composition is resistant to rain and detergents for a long time, provides long-lasting protection against harmful UV and IR radiation and repels water
- it has dry effect – the treated surface is not oily and sticky. It does not attract dust or dirt.
- further treatment of already treated surfaces is very easy – just wipe them with Microfiber towel
- the product can be applied in both high and low temperatures, even in direct sunlight
- -it unites colours of treated surfaces which are left without stains or smudges.

APPLICATION:

- clean the surface with the NONSENSE or GREENCLEAN product first
- apply this creamy product with Microfiber towel or applicator and wipe it on the surface.
- allow the applied product to soak for about 3-5 minutes, then wipe the surface with dry Microfiber towel, MF Fluffer, El Gordo or Monster Microfiber towel

6. SILK SHINE SPRAYABLE DRESSING NATURAL SHINE W/ Weather - Tek Protectant– a product for rejuvenation and impregnation of plastics, rubber and vinyls with long-lasting durability and dark satin shine. It is antistatic, repels dust and water and prevents the surface from fading and aging due to the effect of UV and IR radiation.

ProductCode :TVD_109_16 (16 oz)

ProductCode :TVD_109 (1 Gal)

EXTERIOR +INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

Silk Shine Dressing is a new product with a NEW CAR scent, specifically designed to treat surfaces of tires and vinyl, rubber and plastic parts of your car in both interior and exterior. It does not contain any solvents or VOCs. It creates non-greasy, dry, dark satin surface because it does not contain any silicones or fats. It slows down colour fading and restores original colours of plastics. When regularly used it prevents the surface from premature aging, cracking and getting dirty

and it contains barriers which perfectly protect the surface against UV and IR radiation. The product easily keeps materials in their original condition and maintains ideally smooth surface for a long time. It repels dust and small particles. Next treatment of surfaces previously treated by this product takes less time. It is suitable for all types of rubber and plastic surfaces. In your car interior it can be used on dashboards, consols, door paddings, moldings and seals. It is ideal for treatment of outdoor plastics, for protection of bumpers, rear-view mirrors, tires and window and vinyl roofs seals. This „intelligent bandage“ works as a protection and its application is very easy.

APPLICATION: Spray small amount of the product evenly directly onto treated surface or wipe it on with Microfiber towel or application pad UFO and wipe it dry with MF Fluffer,

El Gordo or Monster Microfiber towel. You can control the level of shine by lowering intensity of wiping the surface down after the application. Highly polluted parts need to be perfectly cleaned prior to Silk Shine Sprayable Dressing application, using CG – All Purpose Cleaner or CG - Nonsense. The product delivers natural dark satin shine. The treated surfaces literally shine and are as new. The easy application can be done in both high and low temperatures, even in direct sunlight. If needed repeat the process for bigger shine and protection. It is recommended that you use the CONTOUR EZ - FORM APPLICATOR ACC_2001 for application on tires. This product makes your work much easier and more effective.

PRODUCT ADVANTAGES:

- it restores original colours and condition of plastics, rubber and vinyls
- it prevents the surfaces from premature aging due to the effect of UV and IR radiation
- an easy application and polishing
- it delivers dark satin shine and treated surfaces are as new
- it is antistatic and repels dust and dirt
- it can be applied in both high and low temperatures, even in direct sunlight
- the application does not change colours of surfaces and leaves no stains or smudges.

7. G6 HYPER COAT HIGH GLOSS COATING PROTECTANT DRESSING-a

special DRESSING with long-lasting durability which restores shine and provides maximum protection against IR and UV radiation. It protects the surface from road dirt and environmental impacts. Emulsion layer delivers extremely high, wet looking shine to plastic, vinyl and rubber parts, synthetic leather and all other black surfaces, including tires.

ProductCode :TVD_110_16 (16 oz)

ProductCode :TVD_110 (1 Gal)

EXTERIOR +INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

This protective product containing synthetic polymers binds on molecular level to the surface, penetrates it and creates an elegant dark, extremely shiny, resistant, non-greasy and dry-to-touch coat on tires and plastic parts in both interior and exterior. The innovative G6 Hyper Coat is resistant to water and maximally protects treated surfaces against IR + UV radiation, as well as dirt. It restores original colours of materials and when regularly used it prevents the surface from premature aging, cracking and fading and maintains ideally smooth surface for a long time. It repels dust and small particles. Next treatment of surfaces previously treated by this product takes less time. It is suitable for all types of rubber and plastic surfaces in exteriors. In your car interior it can be used on dashboards, consols, synthetic leather, door paddings, moldings and seals. It is ideal for treatment of outdoor plastics, for protection of bumpers, rear-view mirrors, tires and window and vinyl roofs seals.

APPLICATION: apply the product in one layer, for more shine and prolonged life apply second layer after the first becomes dry. Apply small amount of the product evenly onto

treated surface with Microfiber towel or application pad UFO. Allow it to soak and then wipe it dry with MF Fluffer, El Gordo or Monster Microfiber towel. You can control the level of shine by lowering intensity of wiping the surface down after the application. Highly polluted parts need to be perfectly cleaned prior to G6 Hyper Coat High Gloss application, using CG – All Purpose Cleaner or CG - Nonsense. The product delivers natural dark satin shine. The treated surfaces literally shine and are as new. The easy application can be done in both high and low temperatures, even in direct sunlight. If needed repeat the process for bigger shine and protection. It is recommended that you use the CONTOUR EZ - FORM APPLICATOR ACC_2001 for application on tires. This product makes your work much easier and more effective.

PRODUCT ADVANTAGES:

- it restores original colours and condition of plastics, rubber and vinyls
- it prevents surfaces from premature aging due to the effect of UV and IR radiation
- an easy application and polishing
- it delivers dark satin shine and treated surfaces are as new
- it is antistatic and repels dust and dirt
- it can be applied in both high and low temperatures, even in direct sunlight
- it delivers maximum shine and protection to tires and exterior plastics
- the application does not change colours of surfaces and leaves no stains or smudges.

8. AIR SPRAY 1 - Black on Black Instant Shine Interior & Exterior Spray Dressing - a special cleaning, reviving and impregnating aerosol dressing for plastics, rubber and vinyl in interiors and exteriors of cars, motorbikes, planes and boats. It also immediately renovates hard-to-reach areas in engine compartments and leaves high shine.

Product Code : AIR_SPRAY_1

EXTERIOR / INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (110oz) – 312g

Black on Black Spray - Dressing is the fastest and the most efficient aerosol cleaner designed to instantly revive black interior and exterior plastics, rubber and vinyls. Thanks to its unique atomization process, the product penetrates even the smallest and hardest-to-reach places and instantly cleans, renovates and restores shine of surfaces, while delivering long-lasting impregnation. It also dries quickly. The product is very suitable for renovation of plastics and rubber components in engine compartments, as well as all other hard-to-reach places, such as air vents, grilles, masks and hard-to-reach engine parts

of motorbikes. This quick reviver of surfaces delivers perfect finish with minimal strain and amazing black deep effect. The product contains UV light absorbers which protect the surface against untimely ageing caused by UV and IR radiation.

APPLICATION:

Spray small amount of the product evenly onto the treated surface. Wipe dry using the Microfiber towel **MIC_102_01**. For even bigger shine and protection repeat the process. The product provides the surface with dark natural velvet shine, treated surfaces literally shine and look as new. This easy application can be done in high or low temperatures, even in direct sunlight.

WARNING: Before you use the product you need to clean heavily polluted parts of the body perfectly with CG All Purpose Cleaner **CLD_1010_16**, CG Extreme Orange Degreaser **CLD_106_16** or CG Nonsense **SPI_993_16** using the Microfiber towel **MIC_102_01**.

PRODUCT ADVANTAGES:

- it keeps the original colour and condition of plastics, rubber, and vinyls
- it prevents untimely ageing caused by UV and IR radiation
- an easy application and buffing off, the product delivers radiant shine
- spray residue is easily removed from glass and paint just by polishing off
- it delivers dark velvet shine and leaves treated surfaces as new
- it is antistatic and repels dust and dirt
- it can be applied in both high and low temperatures, even in direct sunlight
- after application the surface of materials is evenly coloured without stains or smudges

GAP – PRODUCTS FOR RENOVATION - CORRECTION, POLISHING, LAYERING AND LONG LASTING IMPREGNATION OF CAR PAINTS

1. WET MIRROR FINISH ULTRA SlickGlossMagnifier – a special polish engineered on nanotech level for quick application and easy polishing off. It contains carnauba wax which delivers deep wet shine effect with long-lasting resistance to IR + UV radiation, scratching and road dirt contamination.

ProductCode : **GAP_104_16** (16 oz)

ProductCode : **GAP_104** (1 Gal)

EXTERIOR + INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser – (16oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

Wet Mirror Finish Gloss reflects like a mirror and delivers beautiful deep wet shine which allows your paint to breathe and brightens up its colour. The unique composition of this polish, containing carnauba wax besides other quality ingredients, enhances shine of every surface by 18% - 20%, making the surface antistatic and maximally resistant to water, dirt,

contamination and IR + UV radiation. This perfect polish reduces friction on surface and makes it repellent to scratches. It gives perfect shine to your car paint, as well as other materials, such as laminate, chromium or stainless steel. It does not peel off, crack or turn yellow.

PRODUCT ADVANTAGES:

- an extremely easy and quick application, as well as polishing off
- after application and polishing off it creates a perfect wet-shine effect on the surface
- it never contaminates plastic or rubber parts of the bodywork
- it can be applied even in direct sunlight
- it contains very effective UV and IR radiation filters
- it can be applied on any synthetic wax – an ideal finishing product
- suitable for treatment of all kinds of painted surfaces – paints, glass, stainless steel, fibreglass, stainless wheels and chrome parts
- suitable for all paints and their colour shades
- the product is manufactured on a nanotech scale which bonds the molecules to your paint – its composition is similar to a popular paste wax XXX Hardcore Paste Waxale. Its creamy consistence enables an easy and quick application.

APPLICATION:

- shake the product thoroughly before application
- the product is applied in a thin coat by machine or by hand using a foam applicator UFO
- apply a thin coat of the product on perfectly clean paint using a Microfiber towel or one of CG applicators
- on horizontal surfaces (bonnet, roof and boot lid) apply the product with a backward-and-forward motion. On vertical surfaces apply the product with a side-to-side motion
- apply the product softly and do not push. Apply the product separately on each part of your bodywork.

- polish the surface of each part perfectly with a Microfiber towel immediately after you finish the application. Proceed one part at a time.

2.BLACK LIGHT- HYBRID RADIANT SUPER FINISH - Black Light is a new, unique, 100% synthetic wax of a new generation. It delivers highly glossy, smooth and compact finish with wet look and perfect deep shine, along with very long durability. It has high antistatic qualities which reduce clinging of dust to your paint.

ProductCode :**GAP_619_16** (16 oz)

ProductCode :**GAP_619**(1 Gal)

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser – (16oz) – 0,473 L

Big package can (1Galon) – 3,8 Litre

Black Light is a unique 100% synthetic wax of a new generation which contains high volume of gloss enhancers and is capable of masking (filling in) microscopic imperfections of your paint that reduce final shine and optical cleanness after treatment. This hybrid nanotechnology delivers high wet-looking shine with long-lasting antistatic protection which perfectly prevents dust and dirt from clinging to surface. The product can be used as a final polish or foundation for another layer of wax. It is

highly compatible with final carnauba waxes, such as XXX Hardcore Paste Wax, Petes 53, E – Zyme and others. For shine maximalization and follow-up maintenance the Hybrid V7 spray is highly suitable. The second layer, the wax, should not be applied until 30 minutes after BL application.

PRODUCT ADVANTAGES:

- an extremely easy and quick application, as well as polishing off
- it can be used as a final polish or a foundation for another layer of finishing wax
- after application and polishing off it creates a perfect wet-shine effect on the surface
- it never contaminates plastic or rubber parts of the bodywork
- it can be applied even in direct sunlight
- it contains very effective UV and IR radiation filters
- suitable for all paints and their colour shades
- the product is manufactured on a nanotech scale which bonds the molecules to your paint and creates perfect conditions for another layer of other finishing wax

APPLICATION:

- shake the product thoroughly before application
- the product is applied in a thin coat by machine or hand using a foam applicator UFO
- apply a thin coat of the product on perfectly clean paint using a Microfiber towel or one of CG applicators
- on horizontal surfaces (bonnet, roof and boot lid) apply the product with a backward-and-forward motion. On vertical surfaces apply the product with a side-to-side motion.
- apply the product separately on each part of your bodywork.
- after the application let the product dry for 15 minutes and polish it off with a Microfiber towel
- if you use Black Light as a finishing treatment, use bigger pressure during the application.

- if you put another coat of wax on the product, use minimal pressure during the application.

3. P40 POLISH - Final Step FinishPolish – a single-phased product designed for gentle final polishing and removing of holograms, small paint damage from car wash and other imperfections of your paint. It contains divisible abrasive micro particles that fall apart to smaller ones during the application. This technology of gradual break-down of abrasive particles guarantees perfect, even and strainless polishing of your car paint.

ProductCode :GAP_105_16 (16 oz)

ProductCode :GAP_105(1 Gal)

EXTERIOR + INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser – (16oz) – 0,473 L

Big package can (1Galon) – 3,8 Litre

This single-phased polish is used for gentle final polishing. It contains small abrasive particles that quickly and without strain remove small scratches and holograms and other paint imperfections of this sort. It delivers a deep shine effect to your paint. Polish P40 restores light, as well as dark paints, removes scratches, mild oxidation and matte swirls (2.300 - 3.

500 grit). It is great for new cars with new paints, as well as for older and overhauled paints. Evolutionary technology of the product guarantees 100% success without damaging your paint. It can be applied by hand using a white pad or by machine using an orbital polisher. For machine application we recommend that you use **HEX LOGIC pads**.

PRODUCT ADVANTAGES:

- exceptional shine and final polishing of your paint in one step
- it quickly removes small scratches, matte areas and dissolves water stains and dirt on your paint
- it is suitable for both new and old paints
- it is used as a final step product or as a foundation for other waxes and impregnation sealants
- it does not contain any fillers or silicones
- it can be applied by hand or machine. For machine rotary polishing use white Hex-Logic Pad.

APPLICATION BY HAND:

- shake the product thoroughly before application
- apply a thin coat of the product on perfectly cleaned and optimally decontaminated paint surface using a foam applicator or a Microfiber towel made of quality cotton/Microfiber
- we recommend that you use CG applicators.

PRODUCT ADVANTAGES:

- a very easy application and polishing off with a deep wet-looking shine effect
- an easy application can be done in high temperatures, even in direct sunlight
- maximum effect can be achieved with dark paint shades, as well as other shades.
- the product guarantees long-lasting impregnation and protection against UV light up to one year. That all with a banana scent.
- the product does not leave residue on rubber or plastic parts of your car.
- on horizontal surfaces (bonnet, roof and boot lid) apply the product with a backward-and-forward motion. On vertical surfaces apply the product with side-to-side motion.

- apply the product softly and do not push. Apply the product separately on each part of the bodywork.
- let the product dry for a while
- polish the surface of each part perfectly with a Microfiber towel immediately after you finish the application
- after the application wash your car with a CG car shampoo which does not wash off waxes.

4. GLOSSWORKZ GLAZE FINISH - a revolutionary product designed to quickly clean paint surface and achieve maximally deep wet shine finish. Once applied, it fills in fine scratches, swirls and other minor paint imperfections and makes the surface uniform and smooth. It is also great for the surface of reflectors after their mechanical renovation. It fills in and conserves scratches that are created during polishing and contains UV light blocking agents that prevent the surface from ageing and oxidation. The created shine stands out especially on black, red and dark paints.

ProductCode :**GAP_618_16** (16 oz)

ProductCode :**GAP_618**(1 Gal)

EXTERIOR + INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser – (16oz) – 0,473 L

Big package can (1Galon) – 3,8 Litre

Glossworkz Glaze is a breakthrough product delivering quick treatment, cleaning and polishing of the damaged car paint caused by common car operation and car washes with brushes, with a minimal strain. It works as an interstage between correction (polishing) and waxing. Due to a new technology the product manages to fill in fine scratches, holograms and other minor paint imperfections, as well as deliver long-lasting deep wet shine finish to your paint, all that in one step. It contains UV light blocking agents that protect the surface for a long time from harmful sun rays, ageing and oxidation. The product can be applied by hand using special

HEX BUF_X_201 / BUF_X_202 / BUF_X_203 pads or by machine rotary polishing with the **PORTER CABLE 7424 Orbital polisher** (code: BUF_100.1XP) using **HEX-LOGIC** finishing pads by Chemical Guys or other world manufacturers' products.

PRODUCT ADVANTAGES:

- filling in fine imperfections, delivering exceptional shine and final polishing of your paint in one step
- it quickly removes minor scratches and matte areas and dissolves water stains and dirt on your paint
- it is suitable for both new and old paints of all colours
- it is used as a final step product
- it is suitable for hand or machine application. For machine rotary polishing use the white Hex-Logic pad **BUF_X_104HEX6**.

APPLICATION BY HAND:

- shake the product well before use
- -before you apply the product the paint needs to be perfectly clean and free of all asphalt stains and ingrained road dirt, and optimally decontaminated with the decontamination bar (clay) (code: **CLY_202_180 GR**) and the lube (code: **WAC_CLY_100_16**)

- apply a thin coat of the product to the clean and decontaminated surface using a foam applicator or microfiber towel of a quality cotton/microfiber
- we recommend that you use Chemical Guys applicators
- for hand polishing use special **HEX BUF_X_201 / BUF_X_202 / BUF_X_203** pads
- always work on an area of maximum size 60cm x 60cm at a time
- then wipe the surface with the soft **Monster Extreme Thickness Microfiber MIC_1100** and check the condition of paint from different angles. Repeat the application if needed.

APPLICATION BY MACHINE:

- shake the product well before use
- before you apply the product the paint needs to be perfectly clean and free of all asphalt stains and ingrained road dirt, and optimally decontaminated with the decontamination bar (clay) (code: **CLY_202_180 GR**) and the lube (code: **WAC_CLY_100_16**)
- always work on an area of maximum size 0,6 x 0,6 m at a time
- this product is best applied with a polishing and application pad **HEX - LOGIC POLISHING BUF_X_104HEX6**
- Choose the diameter of the pad according to the size of a backing plate.
- put 5 major drops of the product (about 1cm) on the pad spirally from the centre to the edge of the pad and turn it by 30 degrees. The distance between individual drops should be 1 - 2 cm, depending on the pad size.
- take the pad with applied polishing paste and evenly make 4 - 6 imprints on the chosen surface of the bodywork
- start the polishing at about 600 RPM speed (first gear) and apply the paste to the whole chosen area. Then polish at 1500 to 1800 RPM speed as needed.
- use only the weight of the polisher to do the polishing, do not push!!
- work crosswise - horizontally and then vertically, bit by bit until the paste forms a transparent film. Then wipe the surface with a dry **Monster Extreme Thickness Microfiber MIC_1100** and check the condition of paint from different angles. Repeat the application if needed. If you do so, you need to add adequate amount of the product to the pad.
- after the application the paint is shiny and resistant to weather conditions and road dirt for a long time.

5. V38 OPTICAL FINAL POLISH - Optical Grade Final Polish - the latest finishing and final step polishing paste formulated with the hybrid nano technology. It is designed for fine, final polishing and quickly and evenly removing minor damage of paint (2300 to 3500 grit sanding), such as minor scratches, holograms, mild oxidation, matte whirls and similar imperfections of paint that are created during regular car operation and in car washes with brushes. It is suitable for final machine rotary polishing with the PORTER CABLE 7424 Orbital polisher (code: BUF_100.1XP) using HEX-LOGIC polishing pads by Chemical Guys or other world manufacturers' products.

ProductCode : **GAP_V38_16** (16 oz)

ProductCode : **GAP_V38_32** (32 oz)

ProductCode : **GAP_V38** (1 Gal)

EXTERIOR + INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser - (16oz) - 0,473 L

Bigger package - (32oz) - 0,960 L

Big package can (1Galon) - 3,8 Litre

A very fine water-based finishing and polishing paste for perfectionists, without silicones, fillers or oils, designed for ultra fine final polishing using abrasive micro particles. It can be used as a stand-alone product for fine polishing of bodywork or as a final step product after complete correction (cutting) and treatment of paint. This hybrid nano technology quickly and reliably removes minor imperfections of paint (2300 - 3500 grit sanding), minor scratches, holograms, mild oxidations, matte swirls and other similar imperfections caused by regular car operation or mechanized car washes. When applied by machine rotary polishing, the product delivers high shine with maximum optical clarity and deep wet finish to your paint. V38 restores light, as well as dark paints, while providing the paint with long-lasting, antistatic protection that perfectly prevents dust and dirt from clinging to the surface. It is suitable for all types of paints. It is great for new cars with new paints, as well as for older and overhauled paints. The product is formulated with the evolutionary nano technology that guarantees 100 % success, eliminating the risk of paint damage. It contains abrasive micro particles that fall apart to smaller ones during the application. It works as a special compound which turns into polishing wax during the polishing process. This dust-free technology of gradual break-down of abrasive micro particles guarantees strainless, perfect and even polishing of your car paint without stains and matte swirls. It can be applied by hand or using a special eccentric (orbital) polisher and polishing pads. We recommend that you use **HEX - LOGIC pads** for machine polishing - **it is the most advanced latest pad technology**. It maximally complies even with the most demanding requirements.

APPLICATION BY HAND:

- shake the product well before use
- -before you apply the product the paint needs to be perfectly clean and free of all asphalt stains and ingrained road dirt, and optimally decontaminated with the decontamination bar (clay) (code: **CLY_202_180 GR**) and the lube (code: **WAC_CLY_100_16**)
- apply a thin coat of the product to the clean and decontaminated surface using a foam applicator or microfiber towel of a quality cotton/microfiber
- we recommend that you use Chemical Guys applicators
- for hand polishing use special **HEX BUFX_201 / BUFX_202 / BUFX_203** pads
- always work on an area of maximum size 60 cm x 60 cm at a time
- immediately after you finish application on individual parts of the bodywork polish the surface of each part perfectly with a soft microfiber towel **Monster Extreme Thickness Microfiber MIC_1100**.

After you finish polishing, always use one of Chemical Guys synthetic waxes:

WAC_118_16 JET SEAL 109 or BLACK – SIGNATURE PASTE WAX SINGLE JAR, SS6 SECOND SKIN HYBRID VEHICLE COATING SYSTEM.

For final treatment use one of Chemical Guys natural waxes:

PETE'S 53' – PEARL SIGNATURE PASTE WAX, 5050 LIMITED SERIES CONCOURS PASTE WAX,

CELESTE DETTAGLIO – CARNAUBA PASTE WAX

These products deliver long-lasting resistance, durability and high shine to the surface.

APPLICATION BY MACHINE:

- shake the product well before use
- before you apply the product the paint needs to be perfectly clean and free of all asphalt stains and ingrained road dirt, and optimally decontaminated with the decontamination bar (clay) (code: **CLY_202_180 GR**) and the lube (code: **WAC_CLY_100_16**)
- always work on an area of maximum size 0,6 x 0,6 m at a time
- this finest polishing paste is best applied with the polishing and finishing pad HEX - LOGIC FINISHING **BUF_X_107HEX6**. Choose the diameter of the pad according to the size of a backing plate. Put 5 major drops of the product (about 1cm) on the pad spirally from the centre to the edge of the pad and turn it by 30 degrees. The distance between individual drops should be 1 - 2 cm, depending on the pad size.
- take the pad with applied polishing paste and evenly make 4 - 6 imprints on the chosen surface of the bodywork
- start the polishing at about 600 RPM speed (first gear) and apply the paste to the whole chosen area. Then polish at 1500 to 1800 RPM speed as needed
- use only the weight of the polisher to do the polishing, do not push!
- work crosswise - horizontally and then vertically, bit by bit until the paste forms a transparent film. Then wipe the surface with the soft **Monster Extreme Thickness Microfiber MIC_1100** and check the condition of paint from different angles. Repeat the application if needed. If you do so, you need to add adequate amount of the product to the pad.
- after the application the paint is shiny and thanks to nano ceramic layer resistant to regular scratches.

RECOMMENDATION:

After perfect polishing of your paint always one of Chemical Guys finishing products:

WAC_118_16 JET SEAL 109 or BLACK – SIGNATURE PASTE WAX SINGLE JAR, SS6 SEKOND SKIN HYBRID VEHICLE COATING SYSTEM. These products deliver long-lasting resistance, durability and high shine to the surface.

For final treatment use one of Chemical Guys natural waxes:

PETE'S 53' – PEARL SIGNATURE PASTE WAX,
5050 LIMITED SERIES CONCOURS PASTE WAX,
CELESTE DETTAGLIO – CARNAUBA PASTE WAX

ADVANTAGES OF HAND APPLICATION:

- very easy application and polishing off delivering wet-look shine effect
- an easy application can be done in high temperatures, even in direct sunlight
- maximum effect can be achieved with dark paint shades, as well as other shades.
- the product guarantees long-term impregnation and protection against UV light for up to 1 year
- there is no product residue on rubber and plastic parts of your car after the application.
- on horizontal surfaces (bonnet, roof and boot lid) apply the product with a backward-and-forward motion. On vertical surfaces apply the product with a side-to-side motion.
- apply the product softly and do not push.
- apply the product and polish it off one part at a time
- let the product dry for a while

ADVANTAGES OF MACHINE APPLICATION:

- the quickest and easiest way of removing moderate paint damage, fine scratches, oxidations, holograms and whirls

- it easily restores shine of matte, faded and old paints (2300 to 3500 grit sanding) without leaving usual matte stains and delivers a consistent shine to the whole treated surface.
- its wide scope and perfect technology reduce number of passes of the pad
- it is very effective and saves time and strain
- -it ensures perfect protection of paint against damage caused by cutting and delivers high final clear shine without scratches and holograms.

6. V36 OPTICAL GRADE CUTTING POLISH - REDEFINING WHAT A PERFECT FINISH - the latest polishing paste formulated with the hybrid nano technology. It is designed for fine polishing. It is suitable for basic machine rotary polishing with the PORTER CABLE 7424 Orbital polisher (code: BUF_100.1XP) and for quickly and evenly removing medium paint defects (to 2500 grit sanding), such as minor scratches, holograms, mild oxidation, matte whirls and similar imperfections of paint that are created during regular car operation or in mechanized car washes with brushes. For polishing use HEX - LOGIC cutting and polishing pads by Chemical Guys or other world manufacturers' products.

ProductCode : **GAP_V36_16** (16 oz)

ProductCode : **GAP_V36_32** (32 oz)

ProductCode : **GAP_V36** (1 Gal)

EXTERIOR + INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser - (16oz) - 0,473 L

Bigger package - (32oz) - 0,960 L

Big package can (1Galon) - 3,8 Litre

This water-based polishing paste for perfectionists, without silicones, fillers or oils is designed for fine polishing using abrasive micro particles that fall apart. This hybrid nano technology quickly and reliably removes minor imperfections of paint (to 2500 grit sanding), minor scratches, holograms, mild oxidations, matte swirls and other similar imperfections of paint caused by regular car operation or mechanized car washes. When applied by machine rotary polishing, the product delivers high shine with maximum optical clarity and deep wet finish to your paint. V36 restores light, as well as dark paints, delivering long-lasting antistatic protection which perfectly prevents dust and dirt from clinging to surface. It is suitable for all types of paints. It is great for new cars with new paints, as well as for older and overhauled paints. The product is formulated with an evolutionary nano technology that guarantees 100 % success, eliminating the risk of surface damage. It contains abrasive micro particles that fall apart to smaller ones during the application. It works as a special compound which turns into polishing wax during the polishing process. This dust-free technology of gradual break-down of abrasive particles guarantees perfect, even and strainless polishing of your car paint without stains or matte whirls. It can be applied by hand or using a special eccentric (orbital) polisher and polishing pads. We recommend that you use **HEX - LOGIC pads** for machine polishing - **it is the most advanced latest pad technology**. It maximally complies even with the most demanding requirements.

APPLICATION BY HAND:

- shake the product well before use
- before you apply the product the paint needs to be perfectly clean and freed of all asphalt stains and ingrained road dirt, and optimally decontaminated with the

decontamination bar (clay) (code: **CLY_202_180 GR**) and the lube (code: **WAC_CLY_100_16**)

- apply a thin coat of the product to the clean and decontaminated surface using a foam applicator or microfiber towel of a quality cotton/microfiber

- its wide scope and perfect technology reduce number of passes of the pad
- it is very effective and saves time and strain
- -it ensures perfect protection of paint against damage caused by cutting and delivers high and clear final shine without scratches and holograms.

7. V34 OPTICAL GRADE HYBRID COMPOUND - Designed with precision technology to eliminate heavy paint defects and imperfections - it is the

latest fine correction (cutting) paste formulated with the hybrid nano technology, suitable for basic machine rotary cutting with the PORTER CABLE 7424 Orbital polisher (code: BUF_100.1XP) and for removal of moderate damage, scratches and oxidations from your paint using Chemical Guys HEX - LOGIC cutting and polishing pads or other manufacturers' products

ProductCode : **GAP_V34_16** (16 oz)

ProductCode : **GAP_V34_32** (32 oz)

ProductCode : **GAP_V34** (1 Gal)

EXTERIOR + INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser - (16oz) - 0,473 L

Bigger package - (32oz) - 0,960 L

Big package can (1Galon) - 3,8 Litre

This fine correction (cutting) paste is designed to remove moderate damage, scratches and oxidation from paints, but most importantly to restore shine of matte, faded and old paints (1500 to 2000 grit sanding). It can be used as the second step product after applying the course cutting paste V32. Its effective wide scope reduces number of passes of the pad over the treated surface, saves time and increases labour productivity. During polishing with a rotary polisher and cutting pads this new

unique abrasive system and its particles gradually break down to finer and finer particles, depending on length of the polishing process and the temperature, creating perfectly polished surface, all in one easy step. It works as a fine abrasive compound which turns into polishing wax during the polishing process. This system guarantees perfect protection of your paint against damage caused by cutting and delivers high final gloss without scratches or holograms. It is ideal for any fine cutting or polishing job, and for all types of surfaces and paint shades. **V34 is meant to be used in combination with the V36 polishing product for basic polishing and finally with the V38 product for final polishing which provides the paint with perfectly clear and brilliant shine and perfect look.**

PRODUCT APPLICATION AND ITS TECHNOLOGY:

- before you apply the product the paint needs to be perfectly clean and free of all asphalt stains and ingrained road dirt, and optimally decontaminated with the decontamination bar (clay) (code: **CLY_202_180 GR**) and the lube (code: **WAC_CLY_100_16**)
- always work on an area of maximum size 0,6 x 0,6 m at a time
- this fine cutting paste is ideal to use with HEX - LOGIC cutting pad MEDIUM **BUFX_102HEX6**. Choose the diameter of the pad according to the size of a backing plate.
- put 5 major drops of the product (about 1cm) on the pad spirally from the centre to the edge of the pad and turn it by 30 degrees. The distance between individual drops should be 1 - 2 cm, depending on the pad size.
- take the pad with applied cutting paste and evenly make 4 - 6 imprints on the chosen surface of the bodywork
- start the cutting at about 600 RPM speed (first gear) and apply the paste to the whole chosen area. Then polish at 1500 to 1800 RPM speed as needed
- use only the weight of the polisher to do the cutting, do not push!!
- work crosswise - horizontally and then vertically, bit by bit until the paste forms a transparent film. Then wipe the surface with the soft **Monster Extreme Thickness Microfiber MIC_1100** and check the condition of paint from different angles. Repeat the application if needed. If you do so, you need to add adequate amount of the product to the pad.
- after the application the paint is shiny and thanks to nano ceramic layer resistant to regular scratches.

RECOMMENDATION:

after you finish cutting and polishing always use one of Sealants (**WAC_118_16 JET SEAL 109**) for final surface treatment. This product delivers final high shine to the surface, together with long-lasting durability and resistance.

PRODUCT ADVANTAGES AND ITS TECHNOLOGY:

- the quickest and easiest way of removing moderate paint damage, scratches, heavy oxidations, holograms and whirls
- it easily restores shine of matte, faded and old paints (1200 to 1500 grit sanding) without leaving usual matte stains, while delivering a consistent shine to the whole treated surface
- its wide scope and perfect technology reduces number of passes
- it is very effective and saves time and strain
- it easily and quickly eliminates unevenness of the paint surface
- it guarantees perfect protection of your paint against damage caused by cutting and delivers high final gloss without scratches or holograms.

8. V32 - OPTICAL GRADE EXTREME COMPOUND - For Complete Correction Of Paint Defects and Imperfections – the most progressive correction (cutting) paste designed with hybrid nano technology, with extremely strong effect, suitable for basic machine rotary cutting with the PORTER CABLE 7424 Orbital polisher (code: BUF_100.1XP) and for removal of the most severe damage, scratches and oxidations from your paint using Chemical Guys' HEX - LOGIC cutting and polishing pads or other manufacturers' products.

ProductCode : **GAP_V32_16** (16 oz)

ProductCode : **GAP_V32_32** (32 oz)

ProductCode : **GAP_V32** (1 Gal)

EXTERIOR + INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser - (16oz) - 0,473 L

Bigger package - (32oz) - 0,960 L

Big package can (1Galon) - 3,8 Litre

This most effective correction (cutting) paste is designed as the first step product to quickly remove extremely severe paint defects, deep scratches, strong oxidation, holograms and whirls and to restore shine of matte, faded and old paints (1200 to 1500 grit sanding). Its wide scope reduces number of passes of the pad over the treated surface, saves time and increases labour productivity. During polishing with a rotary polisher and pads this new unique abrasive system and its particles gradually break down to finer and finer particles, depending on length of the

polishing process and the temperature, creating perfectly polished surface, all in one easy step. It works as an abrasive compound which turns into polishing wax during the polishing process. This system guarantees perfect protection of your paint against damage caused by cutting and delivers high final gloss without scratches or holograms. It is ideal for any cutting or polishing job, and for all types of surfaces and paint shades. **V32 is meant to be used in combination with the V34 product for fine cutting, the V36 product for basic polishing and finally with the V38 product for final polishing which provides the paint with perfectly clear and brilliant shine and perfect look.**

PRODUCT APPLICATION AND ITS TECHNOLOGY:

- before you apply the product the paint needs to be perfectly clean and free of all asphalt stains and ingrained road dirt, and optimally decontaminated with the decontamination bar (clay) (code: **CLY_202_180 GR**) and the lube – (code : **WAC_CLY_100_16**)
- always work on an area of maximum size 0,6 x 0,6 m at a time
- according to the degree of paint damage use the HEX - LOGIC **BUF_X_101HEX6** cutting pad or HEX – LOGIC MEDIUM **BUF_X_102HEX6** cutting pad. Choose the diameter of the pad according to the size of a backing plate.
- put 5 major drops of the product (about 1cm) on the pad spirally from the centre to the edge of the pad and turn it by 30 degrees. The distance between individual drops should be 1 - 2 cm, depending on the pad size.
- take the pad with applied cutting paste and evenly make 4 - 6 imprints on the chosen surface of the bodywork
- start the cutting at about 600 RPM speed (first gear) and apply the paste to the whole chosen area. Then polish at 1500 to 1800 RPM speed as needed
- use only the weight of the polisher to do the cutting, do not push!!
- work crosswise - horizontally and then vertically, bit by bit until the paste forms a transparent film. Then wipe the surface with the soft **Monster Extreme Thickness Microfiber MIC_1100** and check the condition of paint from different angles.

Repeat the application if needed. If you do so, you need to add adequate amount of the product to the pad.

- after the application the paint is shiny and thanks to nano ceramic layer resistant to regular scratches.

RECOMMENDATION: after you finish cutting and polishing always use one of Sealants (WAC_118_16 JET SEAL 109) for final surface treatment. This product delivers final high shine to the surface, together with long-lasting durability and resistance.

PRODUCT ADVANTAGES AND ITS TECHNOLOGY:

- the quickest and easiest way of removing extremely heavy paint damage, deep scratches, heavy oxidations, holograms and whirls
- it easily restores shine of matte, faded and old paints (1200 to 1500 grit sanding) without leaving usual matte stains and delivers a consistent shine to the whole treated surface
- its wide scope reduces number of passes
- it is very effective and saves time and strain
- it easily and quickly eliminates unevenness of the paint surface.
- it guarantees perfect protection of your paint against damage caused by cutting and delivers high final gloss without scratches or holograms.

9. GAP_VKIT_04 - a kit for complete treatment of paint. It contains the V32 course cutting paste, the V34 finer correction paste, the V36 fine polishing paste and the V38 very fine final polishing paste. These products are suitable for basic machine rotary cutting and polishing with the PORTER CABLE 7424 Orbital polisher (code : BUF_100.1XP) and for removal of severe, as well as moderate damage, scratches and oxidations from your paint using Chemical Guys' or other world manufacturers' cutting and polishing pads.

ProductCode : GAP_VKIT_04 (4 oz)

EXTERIOR + INTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser – (4oz X 4 PS)

This special small package contains cutting, polishing and finishing products for complete treatment (correction) of a car's paint. It is suitable for enthusiasts who want to do the cutting and polishing of their cars' faded and matte paints by themselves, for amateurs and weekend enthusiasts who want to correct moderate defects and holograms created during regular car operation and in car washes with brushes, as well as for professionals who want to try the difference between traditional cutting and polishing pastes and this hybrid nano technology which utilizes divisible abrasive micro particles. The result is the paint surface with high and clear final shine without scratches or holograms.

PACKAGE CONTENTS:

V32 - OPTICAL GRADE EXTREME COMPOUND (4 oz – 120 ml)- an extremely strong

correction (cutting) paste designed with the hybrid nano technology, with progressive effect, suitable for basic machine rotary cutting with the PORTER CABLE 7424 Orbital polisher (code: BUF_100.1XP) and for removal of the most severe damage, scratches and oxidations from your paint using Chemical Guys' cutting and polishing HEX - LOGIC pads or other manufacturers' products. It is also suitable for cutting by hand with use of hand cutting pads.

V34 OPTICAL GRADE HYBRID COMPOUND (4 oz – 120 ml)- is a finer correction (cutting) paste designed with the hybrid nano technology, suitable for basic machine

rotary cutting with the PORTER CABLE 7424 Orbital polisher (code: BUF_100.1XP) and for removal of moderate damage, scratches and oxidations from your paint using Chemical Guys' cutting and polishing HEX - LOGIC pads or other manufacturers' products. It is also suitable for finer cutting by hand with use of hand cutting pads.

V36 OPTICAL GRADE CUTTING POLISH (4 oz – 120 ml)- a polishing paste designed with the hybrid nano technology. It is designed for fine polishing. It is suitable for basic machine rotary polishing with the PORTER CABLE 7424 Orbital polisher (code: BUF_100.1XP) and for quickly and evenly removing medium paint defects (to 2500 grit sanding), such as minor scratches, holograms, mild oxidation, matte swirls and similar imperfections of paint created in regular car operation or in mechanized car washes with brushes. For polishing use Chemical Guys' HEX - LOGIC cutting and polishing pads or other manufacturers' products. It is also suitable for polishing by hand with use of hand cutting pads.

V38 OPTICAL FINAL POLISH (4 oz – 120 ml)- a finishing and final polishing paste designed with the hybrid nano technology. It is designed for fine final polishing and quickly and evenly removing minor 2300 - 3500 grit sanding defects, such as minor scratches, holograms, mild oxidation, matte swirls and similar imperfections of paint created in regular car operation or in mechanized car washes with brushes. It is suitable for final machine rotary polishing with the PORTER CABLE 7424 Orbital polisher (code: BUF_100.1XP) using HEX - LOGIC polishing pads by Chemical Guys or other manufacturers' products. It is also suitable for final polishing by hand with use of hand polishing pads.

23. SCRATCH + SWIRL BUF REMOVER- a special single-phased product for polishing and restoration of all painted parts of your car. It contains special abrasive particles with divisible structure. It perfectly removes scratches, matte whirls, oxidation and holograms. It can be applied by hand or machine.

ProductCode : **COM_129_16 (16 oz)**

ProductCode : **COM_129(1 Gal)**

EXTERIOR + MULTIFUNCTIONAL USE

Regular package with dispenser (16 oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

The product quickly and safely removes medium imperfections of your car paint (1500-1700 grit) including scratches, holograms and other imperfections of your paint surface. During polishing with a rotary polisher and pads this new unique abrasive system and its particles gradually break down to finer and finer particles, depending on length of the polishing process and the

temperature, creating perfectly polished surface, all in one easy step. It works as an abrasive compound which turns into polishing wax during the polishing process. This system guarantees perfect protection of your paint against damage caused by grinding and delivers high final gloss without scratches or holograms. It is ideal for any polishing or grinding task and for all types of surfaces and paint shades. This technology enables application in direct sunlight because it contains 100% silicons and ultra – refined oils which work as lubricants. You do not need to use additional fillers or waxes. We recommend that you use a sealant product for the final treatment. This product brings high final shine with long durability.

PRODUCT ADVANTAGES AND ITS TECHNOLOGY:

- the whole polishing process is carried out in one step, there is no need of additional fillers or waxes, only final treatment with a sealant product or other final polish.
- the quickest and easiest way of removing moderate scratches and surface imperfections ensuring consistent shine of treated surface, without leaving usual matte stains.
- • the product works as a perfect consistent compound from A to Z
- • it perfectly removes all moderate to medium imperfections of your paint
- • it easily and quickly eliminates unevenness of your paint.
- • at the beginning of the renovation process the product works as an aggressive abrasive paste which starts with grit range 50, turning into a very soft polish with grit range 1500-1700 that ensures perfect and gentle final polishing.
- For small or local defects of your paint you can apply the product effectively by hand. However, best results are achieved using a high-speed polisher and recommended abrasive pads.

ROTARY GRINDERS/POLISHERS + CUTTING, POLISHING, APPLICATION AND FINISHING PADS + DETAILING ACCESSORIES

1. PORTER CABLE 7424 XP Dual Action Orbital Polisher - a professional orbital (eccentric) rotary paint grinder/polisher of a new construction designed for a complete treatment of your car paint using cutting and polishing pads and correction and polishing products and waxes by Chemical Guys or other car care products manufacturers.

ProductCode :BUF_100.1XP 120V

Porter Cable 7424 XP - is a new eccentric (orbital) rotary polisher with a new construction and very powerful motor designed for corrections (cutting), polishing, application and decontamination of car paints. This brand new construction maximally reduces vibrations, noise and is very effective at the same time. It imitates circular, orbital hand polishing motion and is 100 times faster than hand polishing. It has a very effective transmission cooling system and very low centre that ensures

firm and balanced hold and maximally easy control over the tool, thus ensuring exact and **comfortable** use even for novices. In contrast to other similar polishers available in the market electronic regulation of speed between 2500 and 6800 OPM (oscillations per minute) ensures required performance and perfect smoothness. This polisher works best with suitable (recommended) polishing and cutting pads - Chemical Guys **HEX_LOGIC** or **Lake Country** (considered the world's best by professionals) and is designed for decontamination, waxes and sealants application, cutting and polishing. It perfectly removes holograms, scratches and other imperfections of your paint.

PRODUCT ADVANTAGES:

- a special sensor monitors pressure on the polisher/pad and quickly switches the tool off in case of excessive hand pressure to prevent the treated surface and the tool from being damaged.
- electronic regulation of speed eliminates the risk of paint damage which is often caused by high-speed polishers.
- it cuts and polishes without burns, holograms or other damage.
- you can choose speed for any application, material and surface!
- polishing, cutting and cleaning accessories that are easy to change - pads with Velcro!
- a new construction reduces vibrations and noise significantly.
- orbital polishing - operates by orbiting the shaft with polishing pad around a centre spindle while it freely rotates on its own axis. Counterweight on the other side of a centre spindle moderates vibrations and ensures quiet and calm running.

TECHNICAL SPECIFICATIONS:

Max. Ø of a backing plate	145 mm
Max. Ø of a polishing pad	165 mm
Orbit	8mm
Speed without load	160 – 480 OPM
Speed	2500 – 6800 OPM
Power input	4 A
Power output	1400 W
Fixing	proprietary

Weight 2,6 kg
Power cord length 3m

WARNING: for this model USA - 120V AC power adaptor to convert 220V to 110V is needed

Accessories:

Separate handle
Special polishing backing plate Ø 140 mm with Velcro

2. FLEX L3403 VRG Lightweight German Circular Polisher- a professional lightweight rotary paint grinder/polisher designed for a complete treatment of your car paint using cutting and polishing pads and correction and polishing products and waxes by Chemical Guys or other car care products manufacturers.

Product Code: BUF_L3403VRG

POLISHFLEX is a super light rotary polisher for correction (cutting), polishing, wax and sealants application, decontamination and cleaning of car paints. We recommend that you use it with Chemical Guys **HEX_LOGIC** polishing and cutting pads or **Lake Country** pads (considered the world's best by professionals). Its **ergonomic shape maximally reduces fatigue of a user during work**. Its weight is only **2.6 kg!** The handles' surfaces are rubberized and fit perfectly into your palm. That all together with effective cooling system of transmission and very low centre make the polisher very easy, precise and **comfortable** to use, even for a novice. The construction deals even with small details, such as a spindle lock position. In contrast to other polishers the spindle lock isn't placed on transmission cover, where it could be unconsciously pushed during work, but completely outside the handle area which ensures an ergonomic and maximally utilizable space for your palm. This revolutionary solution was enabled by a unique transmission construction, using a planetary reduction gear. Insertion of planetary gear which reduces the load on an angular gear enabled a significant reduction of noise, extremely robust angle gear and very compact gearbox.

FLEX L3403 VRG is equipped with a powerful motor (1400 watts) offering electronic regulation of speed between 600 and 2100 oscillations per minute. Starting speed (without speed arrestment) is 380 oscillations per minute. The speed scale, too, is maximally optimized for car paint polishing. Overload and overheating protection, as well as protection against unconscious starting (after power-failure) make your work maximally effective and safe.

PRODUCT ADVANTAGES:

- a special ergonomic construction of handles which are covered in rubber prevents sliding.
- electronic regulation of speed with memory cache eliminates the risk of paint damage which is often caused by high-speed polishers.
- it cuts and polishes without burns, holograms or other damage
- slow start, overload protection and speed regulation make the polisher suitable for every application, material and surface!
- easy-to-change polishing, cutting and cleaning accessories - pads with Velcro!
- a new construction reduces vibrations and noise significantly

TECHNICAL SPECIFICATIONS:

Max. Ø of a backing plate	140 mm
Max. Ø of a polishing pad	165 mm
Speed without load	160 – 480 OPM
Speed	1100 – 3700 OPM
Power input	6,2 A
Power output	1400 W
Fixing	proprietary
Weight	2,6 kg
Power cord length	4m

3. Rupes LHR 15ES Big Foot Random Orbital Polisher - a perfect professional orbital (eccentric) rotary paint grinder/polisher with an innovative construction designed for a complete treatment of your car paint using cutting and polishing pads and correction and polishing products and waxes by Chemical Guys or other car care products manufacturers. It is suitable for professional use, as well as weekend enthusiasts.

Product Code: BUF_101.7

Rupes Big Foot is a new eccentric grinder/polisher for 21st century from an Italian producer with tool manufacture tradition since 1947. Years of experience and professional development enabled them to design the most perfect high-performance polisher available in the world's market which is super light and with its pads of 6 inches (16 cm) in diameter ideal for polishing big areas. Its innovative construction, together with the use of recommended Chemical Guys **HEX_LOGIC** polishing and cutting pads, **Lake Country** pads or a **Micro Fiber Pad** (BUFX305_6) (considered the world's best by professionals) make corrections (cutting), paint

polishing, waxes and sealants application, decontamination and cleaning of your car paint easier, quicker and of better quality. This combination results in perfect shiny surface without swirls and holograms thanks to orbital rotation with 15 mm throw. The machine is ideal for professionals, as well as for detailers - beginners and everyone who looks for high-performance, easy-to-use polisher with six-level regulation of speed for different types of application. Its use is multifunctional - great for polishing cars, trucks, ships and motorcycles. **Rupes LHR 15ES** with 15 mm orbital throw enables to work in tight and hard-to-reach places and makes cleaning of small areas much easier. RupesLHR 21ES has 21mm throw and is more suitable for bigger and flat surfaces.

PRODUCT ADVANTAGES:

- suitable both for professionals and amateurs
- powerful enough to polish big areas with 6 inches (16cm) diameter polishing pads.
- it cuts and polishes without burns, holograms or other damage.
- slow start prevents the product from splashing all over
- overload protection and speed regulation make the polisher suitable for every application, material and surface!
- easy-to-change polishing, cutting and cleaning accessories - pads with Velcro!
- a new construction reduces vibrations and noise significantly.
- orbital polishing - operates by orbiting the shaft with polishing pad around a centre spindle while it freely rotates on its own axis. Counterweight on the other side of the centre spindle moderates vibrations and ensures very quiet and calm running
- electronic regulation of speed with memory cache eliminates risk of paint damage which is often caused by high-speed polishers
- unbeatable design

5. Dual - Action Hook & Loop Molded Urethane Flexible Backing Plate-

is a special urethane backing plate designed for quick and firm attachment of cutting and polishing pads to an eccentric (orbital) polisher - PORTER CABLE 7424 XP Dual Action Orbital Polisher. Suitable for polishing pads with 10 cm, 13 - 13,5 cm and 16 cm in diameter. Suitable for 5/16" thread.

Product Code: **BUFLC_BP_DA_3** Ø 8,5 cm (3,5 Inch).

Product Code: **BUFLC_BP_DA_5** Ø 12,5 cm (5,0 Inch).

Product Code: **BUFLC_BP_DA_6** Ø 15,5 cm (6,0 Inch).

Flexible Backing Plate - this new, even better and more durable plate is used for quick and firm attachment of cutting and polishing pads using robust Velcro. It is made of a special Hyper - Flex strong urethane blend, yet is very firm due to reinforced construction which utilizes flexible steel struts moulded into the centre hub. It is maximally adaptable to rounded surfaces, while maintaining a stable and even surface for pads, it is highly resistant and perfectly conducts away the heat created during cutting and polishing. These backing

plates are ideal with PorterCable7424XP rotary orbital polisher and also with recommended polishing and cutting pads of size 4" - Ø 10,5cm 5" - Ø 13cm 5,5" - Ø 15cm 6" - Ø 16cm Chemical Guys **HEX_LOGIC, Lake Country or Micro Fiber Pad** (BUFX305_6) pads (considered the world's best by professionals). This combinations results in shiny and perfect surface of your paint. This new technology makes your work on corrections (cutting), polishing, waxes and sealants application, decontamination and cleaning much easier.

WARNING:- cutting or polishing pad needs to be at least 1cm bigger in diameter than the backing plate. The pad has to overlap backing plate's edges otherwise the paint could get damaged by accidental contact of the backing plate with the treated surface

- always use a suitable adapter when attaching a pad to a polisher

GoodScrew - D.A Adapter 5/8" X 11 - with thread

Product Code :**BUF_SCREW_DA**

GoodScrew- Drill Adapter- without thread

Product Code :**BUF_SCREW_DRILL**

- during cutting/polishing process remember to check that the adapter is tightened in the backing plate and the backing plate is tightened in the machine!!!

ADVANTAGES OF THE BACKING PLATE:

- quick attachment of pads to the backing plate using robust Velcro on the back side. This technology ensures that the pads are easily removed to be cleaned or maintained and attached to be used again

- it is maximally adaptable to rounded surfaces, while maintaining stable and even surface for attachment of pads
- pads are highly resistant to heat and perfectly transfer the heat created during cutting and polishing
- these backing plates are ideal for use with rotary orbital polishers
- high resistance and long durability- they improve cutting and polishing process and make it much easier

6. Lake Country Heavy Cutting Pad Yellow CCS - yellow cutting pads -

these pads are the most aggressive and powerful of cutting pads designed for basic machine rotary cutting with the PORTER CABLE 7424 Orbital polisher (code : BUF_100.1XP) and for removal of the most severe damage, scratches and oxidations from your paint using Chemical Guys' or other world manufacturers' cutting products.

Product Code : **BUFLC_101_3** yellow pad - cutting - \varnothing 8,5 cm = (3 1/2" Inch)

Product Code : **BUFLC_101_5** yellow pad - cutting - \varnothing 13,0 cm = (5 1/4" Inch)

Product Code : **BUFLC_101_6** yellow pad - cutting - \varnothing 16,0 cm = (6 1/2" Inch)

Heavy Cutting - use these efficient cutting pads only for removal of your paint damage or on matte, faded or old paints. This pad with a hard and maximally dense foam is ideal (as the hardest one) for removal of most severe damage and scratches from your paint. **WARNING:** After you finish cutting with this yellow pad, always use an orange cutting/polishing pad BUFLC_102_3 to 5 with the GAP_V36_16 product first, then use a white polishing pad BUFLC_104_3 to 6 together with the Chemical Guys GAP_V38_16 OPTICAL GRADE FINAL POLISH for final soft

polishing.

ADVANTAGES OF THIS CUTTING PAD WITH THE NEW CCS TECHNOLOGY:

- CCS is the newest technology in polishing pads and polishing itself. CCS is an acronym for collapsed cell structures that don't absorb wax. The CCS surface is found in the inner area of pockets which are placed evenly on pad's work surface - indented surface of the pad perfectly copies the curves of the bodywork using constant pressure
- grooves (pockets) absorb polishing paste which is then gradually and evenly released during your work. As a result the polishing paste's consumption is reduced and its splashing outside the treated surface is limited.
- CCS technology slows down the rate of the product's absorption into the foam and reduces the consumption of waxes.
- the grooves enable the air to access the polished surface and reduce the risk of overheating of the surface This way the friction, as well as the heat created between the pad and the treated surface is reduced.
- these new polishing and finishing pads are ideal for all types of waxes.
- they provide better control, less product waste, more accurate results and overall better and more efficient application.
- this product saving design enables a longer time of application without the need to refill the product and thus ensures better polishing and cutting process.

- CCS prevents the paint surface from being damaged due to accidental lack of the product, reduces surface temperature and prevents the product from leaking during vertical application
- the pads are attached to the backing plate using a permanent Velcro on the back side which ensures that the pads are easily removed to be washed or maintained and attached to be used again.

Long-lasting durability and material guarantee make the pads suitable for professional use. The cutting surface doesn't detach from the foam like pads with classic construction. A unique glue and production technology ensure long-lasting durability and quality use of the pads.

Each pad has a different colour and foam density. Different material construction of the pads (hardness) enables to perform different paint care operations, such as cleaning (decontamination), cutting, application of sealants and polishes and final polishing. All types of pads were designed and produced in California, USA and regarding their technology they are the only ones of their kind. It is the newest patented material (foam) with a perfect springing and without vibrations ensuring the best balanced contact with the surface.

Recommended Chemical Guys cutting products:

COM_129_16 Scratch&SwirlBuff

GAP_V32_16 Optical Grade Hybrid Compound

GAP_V34_16 Optical Grade Hybrid Compound

Cutting and polishing pads' maintenance and cleaning:

All pads need to be cleaned after every use. Regular care prolongs their durability, ensures quality work and prevents the paint surface from being scratched - to remove hard and dried polishing or cutting paste use genuine horsehair brush (ACC_663). Use BUF_333_16 - FOAM & WOOL CITRUS - Based Pad Cleaner for gentle final cleaning.

7. Lake Country Light - Medium Cutting Pad Orange CSC – orange grinding pads - for basic machine rotary cutting with the PORTER CABLE 7424 Orbital polisher (code : BUF_100.1XP) and for removal of damage, scratches and oxidations from your paint using Chemical Guys' or other world manufacturers' cutting and polishing products.

Product Code : **BUFLC_102_3** orange pad - cutting/polishing - \varnothing 8,5 cm = (3 1/2" Inch)

Product Code : **BUFLC_102_5** orange pad - cutting/polishing - \varnothing 13,0 cm = (5 1/4" Inch)

Product Code : **BUFLC_102_6** orange pad - cutting/polishing - \varnothing 16,0 cm = (6 1/2" Inch)

Medium Cutting - an orange cutting/polishing pad with a medium hard and very dense foam is ideal (it's rather hard) for removal of scratches, holograms and minor imperfections of your paint. With use of more efficient (rougher) cutting product, such as GAP_V 32_16 OPTICAL GRADE EXTREME COMPOUND or GAP_34_16 OPTICAL GRADE HYBRID COMPOUND, the pad allows to remove deeper scratches and damage without the paint getting matte or getting matte just very slightly. **WARNING:** after you finish cutting with the orange pad, always use a white

polishing pad BUFLC_104_3 to 6 with the GAP_V38_16 OPTICAL GRADE FINAL POLISH for the final soft polishing

ADVANTAGES OF THE CUTTING AND CLEANING PAD WITH THE NEW CCS TECHNOLOGY:

CCS is the newest technology in cutting and polishing pads. CCS is an acronym for collapsed cell structures that don't absorb wax. The CCS surface is found in the inner area of pockets which are placed evenly on pad's work surface - indented surface of the pad perfectly copies the curves of the bodywork using constant pressure

- grooves (pockets) absorb polishing paste which is then gradually and evenly released during your work. As a result the polishing paste's consumption is reduced and its splashing outside the treated surface is limited.
- CCS technology slows down the rate of the product's absorption into the foam and reduces the consumption of waxes.
- the grooves enable the air to access the polished surface and reduce the risk of overheating of the surface This way the friction, as well as the heat created between the pad and the treated surface is reduced.
- these new polishing and finishing pads are ideal for all types of waxes.
- they provide better control, less product waste, more accurate results and overall better and more efficient application
- this product saving design enables a longer time of application without the need to refill the product and thus ensures better polishing and cutting process.
- CCS prevents the paint surface from being damaged due to accidental lack of the product, reduces surface temperature and prevents the product from leaking during vertical application
- the pads are attached to the backing plate using a permanent Velcro on the back side which ensures that the pads are easily removed to be washed or maintained and attached to be used again.

Long-lasting durability and material guarantee make the pads suitable for professional use. The cutting surface doesn't detach from the foam like pads with classic construction. A unique glue and production technology ensure long-lasting durability and quality use of the pads.

Each pad has a different colour and foam density. Cutting and polishing pads' maintenance and cleaning:

All pads need to be cleaned after every use. Regular care prolongs their durability, ensures quality work and prevents the paint surface from being scratched - to remove hard and dried polishing or cutting paste use genuine horsehair brush (ACC_663). Use BUF_333_16 - FOAM & WOOL CITRUS - Based Pad Cleaner for gentle final cleaning.

8. Lake Country Heavy Polishing Pad Green CCS – green polishing pads

- medium hard for basic machine rotary polishing with the PORTER CABLE 7424 Orbital polisher (code : BUF_100.1XP) and for removal of damage, scratches and oxidations from your paint using Chemical Guys' or other world manufacturers' polishing products.

Product Code : **BUFLC_103_3** -green pad - cleaning/polishing - Ø 8,5 cm = (3 1/2" Inch)

Product Code : **BUFLC_103_5** -green pad - cleaning/polishing - Ø 13,0 cm = (5 1/4" Inch)

Product Code : **BUFLC_103_6** -green pad - cleaning/polishing - Ø 16,0 cm = (6 1/2" Inch)

GreenHeavy - this medium hard polishing pad is designed for the first grade machine rotary polishing after the basic cutting of the paint. The pad is made of a very firm foam with 60 pores per square inch. This special foam pad is firm enough to remove damage, holograms and dirt, while delivering high shine to your paint surface.

ADVANTAGES OF THE CLEANING AND POLISHING PAD USING THE NEW CCS TECHNOLOGY:

CCS is the newest technology in polishing pads and polishing itself. CCS is an acronym for collapsed cell structures that don't absorb wax. The CCS surface is found in the inner area of pockets which are placed evenly on pad's work surface - indented surface of the pad perfectly copies the curves of the bodywork using constant pressure

9. Lake Country Light - Medium Polishing Pad White - medium

polishing white pads - for machine rotary polishing with the PORTER CABLE 7424 Orbital polisher (code : BUF_100.1XP) and for application of sealants and waxes and soft final polishing of your paint using Chemical Guys' or other world manufacturers' products.

Product Code :BUFLC_104_3 - application/polishing - \varnothing 8,5 cm = (3 1/2" Inch)

Product Code :BUFLC_104_5 - application/polishing - \varnothing 13,0 cm = (5 1/4" Inch)

Product Code :BUFLC_104_6 - application/polishing - \varnothing 16,0 cm = (6 1/2" Inch)

Medium Polishing Pad - Less is a soft pad designed for micro - gentle polishing and waxes and sealants application. This pad has a very fine cutting surface and is ideal for waxing and fine cleaning, as well as finishing and polishing applications. The pad is made of a very firm foam with 60 pores per square inch. This special foam pad is firm enough to remove dirt, while delivering high shine finish to your paint surface

ADVANTAGES OF THE APPLICATION AND POLISHING PADS WITH THE NEW CCS TECHNOLOGY:

CCS is the newest technology in polishing pads and polishing itself. CCS is an acronym for collapsed cell structures that don't absorb wax. Each pad has a different colour and foam density. Different material construction of the pads (hardness) enables to perform different paint care operations, such as cleaning (decontamination), cutting, application of sealants and polishing products and final polishing. All pads were designed and produced in California, USA and regarding their technology they are the only ones of their kind. It is the newest patented material (foam) with a perfect springing and without vibrations ensuring the best balanced contact with the surface.

GAP_V38_16 Optical Grade Final Polish

Cutting and polishing pads' maintenance and cleaning:

All pads need to be cleaned after every use. Regular care prolongs their durability, ensures quality work and prevents the paint surface from being scratched - to remove hard and dried polishing or cutting paste use genuine horsehair brush (ACC_663). Use BUF_333_16 - FOAM & WOOL CITRUS - Based Pad Cleaner for gentle final cleaning.

10. Lake Country Finishing Pad Black - black finishing and polishing pads

-for machine rotary polishing with the PORTER CABLE 7424 Orbital polisher (code : BUF_100.1XP) and for finishing jobs, application of sealants and waxes and for rougher polishing of your paint using Chemical Guys' or other world manufacturers' products.

Product Code :BUFLC_105_5 - black - finishing/polishing - Ø 13,0 cm = (5 1/4" Inch)

Product Code :BUFLC_105_6 - black - finishing/polishing - Ø 16,0 cm = (6 1/2" Inch)

Finishing Pad - a black finishing and polishing pad with medium dense foam (is rather hard) withstands more pressure on a polisher, as well as pad. It is ideal for application of polishing paste, waxes and sealants and for polishing using the finest polishing products. The pad is made of a very firm foam with 60 pores per square inch. It is softer than other pads with 80 pores per square inch. This special foam pad is firm enough to remove dirt, while delivering high shine to your paint surface.

Advantages of the finishing and polishing pad with the new CCS

technology: CCS is the newest technology in polishing pads and polishing itself. CCS is an acronym for collapsed cell structures that don't absorb wax. The CCS surface is found in the inner area of pockets which are placed evenly on pad's work surface - indented surface of the pad perfectly copies the curves of the bodywork using constant pressure

- grooves (pockets) absorb polishing paste which is then gradually and evenly released during your work. As a result the polishing paste's consumption is reduced and its splashing outside the treated surface is limited.
- CCS technology slows down the rate of the product's absorption into the foam and

reduces the consumption of waxes.

- the grooves enable the air to access the polished surface and reduce the risk of overheating of the surface This way the friction, as well as the heat created between the pad and the treated surface is reduced.- these new polishing and finishing pads are ideal for all types of waxes.
- they provide better control, less product waste, more accurate results and overall better and more efficient application.
- this product saving design enables a longer time of application without the need to refill the product and thus ensures better polishing and cutting process
- CCS prevents the paint surface from being damaged due to accidental lack of the product, reduces surface temperature and prevents the product from leaking during vertical application.
- the pads are attached to the backing plate using a permanent Velcro on the back side which ensures that the pads are easily removed to be washed or maintained and attached to be used again.

Long-lasting durability and material guarantee make the pads suitable for professional use. The cutting surface doesn't detach from the foam like pads with classic construction. A unique glue and production technology ensure long-lasting durability and quality use of the pads.

11. Lake Country Ultra Light Finishing Pad Blue - blue ultra light

finishing pads - the most suitable pads for soft machine rotary polishing of your paint with the PORTER CABLE 7424 Orbital polisher (code: BUF_100.1XP) using Chemical Guys' or other world manufacturers' polishing products.

Product Code :**BUFLC_106_3** - application/light polishing - \varnothing 8,5 cm = (3 1/2" Inch)

Product Code :**BUFLC_106_5** - application/light polishing - \varnothing 13,0 cm = (5 1/4" Inch)

Product Code :**BUFLC_106_6** - application/light polishing - \varnothing 16,0 cm = (6 1/2" Inch)

UltraFinishing - this blue polishing pad is made of a special foam with ultra gentle composition delivering final shine with the use of sealants and liquid waxes. It is softer than pads with 80 pores per square inch. This special foam pad is firm enough to remove regular dirt, while delivering high shine to your paint surface.

Advantages of this ultra light polishing pad with the new CCS technology:

CCS is the newest technology in polishing pads and polishing itself. CCS is an acronym for collapsed cell structures that don't absorb wax. The CCS surface is found in the inner area of pockets which are placed evenly on pad's work surface - indented surface of the pad perfectly copies the curves of the bodywork using constant pressure

12. Cutting Micro Fiber Pad Orange Inner Foam 3/4"- cutting pad

black/orange - is formulated with a new technology of a special EURO - TECH foam and optical microfibers, designed for basic machine rotary polishing with the PORTER CABLE 7424 Orbital polisher (code : BUF_100.1XP) and for removal of serious damage, scratches and oxidations from your paint using Chemical Guys' or other world manufacturers' cutting products.

Product Code :**BUF 300_4** - black-orange - cutting - Ø 10,0 cm = (4,0" Inch)

Product Code :**BUF 302_5** - black-orange - cutting - Ø 13,5 cm = (5,5" Inch)

Product Code :**BUF 304_6** - black-orange - cutting - Ø 16,0 cm = (6,5" Inch)

Microfiber Cutting - these cutting pads formulated with a new Quadro laminate technology work as perfect sandwich which ensures their maximum longevity. Their lower (cutting or polishing surface) and upper parts are made of a strong high-tech optical microfiber material and the centre is filled with a new EURO-TECH foam. Microfiber with a short strand ensures perfect access to all micro chinks and imperfections. This new combination ensures that the undesirable heat is dispersed to the whole pad and the pad's whole area is cooled down during its rotation. The construction makes the pads firm and elastic at the same

time which ensures maximum contact of the whole work surface with the paint surface. They are designed for matte paint corrections and for removing heavy damage, scratches, oxidation and holograms, while restoring clarity and shine of any paint colour. Their angular design allows the pads to access depressions and rounded and hard-to-reach spaces on the bodywork. The pads can be used by beginners, weekend enthusiasts and

professionals who want to achieve perfect results. Their biggest advantage is their special construction which practically eliminates human error.

WARNING: After you finish work (cutting) with this pad, always use a black polishing pad **BUF301_4** with **GAP_V36_16** product and then the same pad with the **GAP_V38_16** **OPTICAL GRADE FINAL POLISH** product by Chemical Guys

Cutting Micro Fiber Pad Orange advantages:

- -a unique construction of microfibers with short strand perfectly copies rounded surface of the bodywork, using a constant pressure.
- bi-angular design allows the pad to maximally access depressions and rounded and hard-to-reach surfaces of the bodywork
- sandwich construction, EURO - TECH foam and new Quadro lamination allow the heat to distribute over the whole surface of the pad and thus reduce the risk of paint overheating
- these new cutting, polishing and finishing Microfiber pads are ideal for all types of correction and polishing pastes and waxes, as well as all types and colours of paints.
- they easily remove severe scratches, holograms and oxidations from your paint. The pads deliver higher quality to your paint and restore depth and shine of your paint
- they prevent the surface from being damaged because of the new construction's ability to partly eliminate human error
- the pads are attached to the backing plate using a permanent Velcro on the back side which ensures that the pads are easily removed to be washed or maintained and attached to be used again.
- long-lasting durability and material guarantee make the pads suitable for professional, as well as amateur use. The cutting surface doesn't detach from the foam like pads with classic construction.
- the unique production technology and extra strong microfiber surface ensure long durability and quality use of the pads.
- 2 types of the pads (3 diameters - sizes) with different hardness allow different paint care operations, such as cleaning (decontamination), cutting (corrections), application of sealants and polishes and ultra final polishing. These pads were designed and produced in California, USA and regarding their technology they are the only ones of their kind. It is the newest patented material with a perfect springing and without vibrations ensuring the best balanced contact with the surface.

13. Polishing / Finishing Micro Fiber Pad Black Inner Foam ¾" – polishing pad black - is formulated with a new technology of a special EURO -TECH foam and optical microfibers, designed for basic machine rotary polishing with the PORTER CABLE 7424 Orbital polisher (code: BUF_100.1XP) and for removal of minor damage, scratches and oxidations from your paint using Chemical Guys' or other world manufacturers' polishing products.

Product Code :**BUFX 301_4** - black-grey pad - polishing - Ø 10,0 cm = (4,0" Inch)

Product Code :**BUFX 303_5** - black-grey pad - polishing - Ø 13,5 cm = (5,5" Inch)

Product Code :**BUFX 305_6** - black-grey pad - polishing - Ø 16,0 cm = (6,5" Inch)

Microfiber Finishing - these polishing pads formulated with a new Quadro laminate technology work as perfect sandwich which ensures their maximum longevity. Their lower (cutting or polishing surface) and upper parts are made of a strong high-tech optical microfiber material and the centre is filled with a new EURO-TECH foam. Microfiber with a short strand ensures perfect access to all micro chinks and imperfections. This new combination ensures that the undesirable heat is dispersed to the whole pad and the pad's whole area is cooled down during its rotation. The construction makes the pads firm and elastic at the

same time which ensures maximum contact of the whole work surface with the paint surface. They are designed for removing minor damage, scratches, oxidation and holograms, as well as final polishing, while delivering deep shine to any paint colour. Their bi-angular design allows the pad to access depressions and rounded and hard-to-reach spaces on the bodywork. The pads can be used by beginners, weekend enthusiasts and professionals who want to achieve perfect results. Their biggest advantage is the special construction which practically eliminates human error.

Polishing Micro Fiber Pad Black advantages:

- -a unique construction of microfibers with short strand perfectly copies rounded surface of the bodywork, using a constant pressure.- bi-angular design allows the pad to maximally access depressions, rounded and hard-to-reach surfaces of the bodywork
- sandwich construction, EURO - TECH foam and new Quadrolamination allow the heat to distribute over the whole surface of the pad and thus reduce the risk of paint overheating
- these new polishing and finishing Microfiber pads are ideal for all types of correction and polishing pastes and waxes, as well as all types and colours of paints
- they easily remove minor scratches, holograms and oxidations from your paint. The pads deliver higher quality to your paint and restore depth and shine of your paint
- they prevent the surface from being damaged because of the new construction's ability to partly eliminate human error

- the pads are attached to the backing plate using a permanent Velcro on the back side which ensures that the pads are easily removed to be washed or maintained and attached to be used again.
- long-lasting durability and material guarantee make the pads suitable for professional, as well as amateur use. The polishing surface doesn't detach from the foam like pads with classic construction.
- the unique production technology and extra strong microfiber surface ensure long durability and quality use of the pads.
- 2 types of the pads (3 diameters - sizes) with different hardness allow different paint care operations, such as cleaning (decontamination), cutting (corrections), application of sealants and polishes and ultra final polishing. These pads were designed and produced in California, USA and regarding their technology they are the only ones of their kind. It is the newest patented material with a perfect springing and without vibrations ensuring the best balanced contact with the surface.

Use BUF_333_16 - FOAM & WOOL CITRUS - Based Pad Cleaner for gentle final cleaning.

14. Hex - Logic Heavy Cutting Pad Yellow - cutting pads yellow - these pads are the most aggressive and efficient of the pads designed for basic machine rotary cutting with the PORTER CABLE 7424 Orbital polisher (code : BUF_100.1XP) and for removal of severe damage, scratches and oxidations from your paint using Chemical Guys' or other world manufacturers' cutting and polishing products

Product Code : **BUF_101HEX5** -yellow pad - cutting - Ø 13,5 cm = (5,5" Inch)

Product Code : **BUF_101HEX6** -yellow pad - cutting- Ø 16,0 cm = (6,5" Inch)

Product Code : **BUF_101HEX** -yellow pad - cutting - Ø 18,5 cm = (7,5" Inch)

Heavy Cutting - these most efficient cutting pads are used only for removal of paint damage and on matte, faded and old paints. This pad with a hard and maximally dense foam is ideal (as the hardest one) for removal of most severe damage and scratches from your paint. **WARNING:** After you finish cutting with this yellow pad, always use an orange cutting/polishing pad BUFLC_102_3 to 5 with the GAP_V36_16 product first, then use a white polishing pad BUFX_104HEX4_4 to 6 together with the Chemical Guys GAP_V38_16 OPTICAL GRADE FINAL

POLISH for soft final polishing.

HEX_LOGIC pads are formulated with laser technology and ensure professional use and maximally accurate application of a polishing product with 100 % coverage on any flat, rounded or vertical surface. HEX_LOGIC pads were designed on the model of honeycombs which ensures that the product stays in the grooves (container) and is evenly distributed over the whole surface of the pad. The product covers the whole surface of the pad which ensures even cutting, polishing and product application. Unique hexagonal cells with grooves (pores) cut by laser bring the air to friction area and perfectly cool down the whole contact area and prevent the paint from overheating. New HEX_LOGIC technology solved all weaknesses and imperfections of regular pads. The used Acu - Foam technology enables to use open cells of different sizes, thus ensuring required hardness of the pad necessary for various types of applications (cutting, polishing, final polishing and product application). The smaller the cells, the denser (harder) the construction. The more the cells are open, the more air they bring to the friction surface. Each product needs the right amount of air which the HEX-Logic construction perfectly ensures.

Advantages of the cutting pad with the new HEX-LOGIC technology:

- it is the world's newest technology in cutting and polishing pads.
- laser-cut surface of the pad enables the pad to perfectly conform to rounded surface of the bodywork with constant pressure
- hexagonal cells with grooves absorb polishing paste which is gradually and evenly released during your work. As a result the polishing paste's consumption is reduced and its splashing outside the treated surface is limited. It maximally saves the product consumption.
- the grooves enable the air to access the polished surface and reduce the risk of overheating of the surface This way the friction, as well as the heat created between the pad and the treated surface is reduced.- these new polishing and finishing pads are ideal for all types of waxes
- they provide better control, less product waste, more accurate results and overall better and more efficient application
- this new design of pad's surface enables a longer time of application without the need to refill the product and thus ensures better polishing and cutting process.
- HEX-LOGIC technology prevents the paint surface from being damaged due to accidental lack of the product, reduces surface temperature and prevents the product from leaking during vertical application
- the pads are attached to the backing plate using a permanent Velcro on the back side which ensures that the pads are easily removed to be washed or maintained and attached to be used again.

Long-lasting durability and material guarantee make the pads suitable for professional use. The cutting surface doesn't detach from the foam like pads with classic construction. A unique glue and production technology ensure long-lasting durability and quality use of the pads.

Each pad has a different colour and foam density. Different material construction of the pads (hardness) enables to perform different paint care operations, such as cleaning (decontamination), cutting, application of sealants and polishes and final polishing. 15. Hex - Logic Medium - Heavy Cutting Pad Orange - cutting pads

orange - for basic machine rotary cutting with the PORTER CABLE 7424 Orbital polisher (code : BUF_100.1XP) and for removal of damage, scratches and oxidations from your paint using Chemical Guys' or other world manufacturers' cutting and polishing products.

Product Code :**BUFX_102HEX4** -orange - cutting/cleaning - \varnothing 10,5 cm = (4,0" Inch)

Product Code :**BUFX_102HEX5** -orange - cutting/cleaning - \varnothing 13,5 cm = (5,5" Inch)

Product Code :**BUFX_102HEX6** -orange - cutting/cleaning - \varnothing 16,0 cm = (6,5" Inch)

Medium Cutting – this orange cutting/cleaning pad of medium hardness and high foam density is ideal (due to its hardness) for removing scratches, holograms and minor paint damage. With use of more efficient (rougher) cutting product, such as GAP_V 32_16 OPTICAL GRADE EXTREME COMPOUND or GAP_34_16 OPTICAL GRADE HYBRID COMPOUND, the pad enables to remove deeper scratches and damage without the paint getting matte or getting matte very slightly. **WARNING:** after you finish cutting with the orange pad, always use a white

polishing pad BUFX_104HEX4_4 to 6 together with GAP_V38_16 OPTICAL GRADE FINAL POLISHfor soft final polishing.

HEX_LOGIC pads are formulated with laser technology and ensure professional use and maximally accurate application of a polishing product with 100 % coverage on any flat, rounded or vertical surface. 16. Hex - Logic Heavy Polishing Pad Green - polishing pads green -

medium hard for basic machine rotary polishing with the PORTER CABLE 7424 Orbital polisher (code : BUF_100.1XP) and for removal of damage, scratches and oxidations from your paint using Chemical Guys' or other world manufacturers' cutting and polishing products.

Product Code : **BUFX_103HEX4** - green pad - cleaning/polishing - \varnothing 10,5 cm = (4,0" Inch)

Product Code : **BUFX_103HEX5** - green pad - cleaning/polishing - \varnothing 13,0 cm = (5,5" Inch)

Product Code : **BUFX_103HEX6** - green pad - cleaning/polishing - \varnothing 16,0 cm = (6,5" Inch)

Heavy Polishing - this medium hard polishing pad is designed for the first grade machine rotary polishing after the basic cutting of the paint. This special foam pad is firm enough to remove damage, holograms and dirt, while delivering high shine to your paint surface.

HEX_LOGIC pads are formulated with laser technology and ensure professional use and maximally accurate application of a polisher with 100 % coverage on any flat, rounded or vertical surface. HEX_LOGIC pads were designed on the model of honeycombs which ensures that the product stays in the grooves (container) and is evenly distributed over the whole surface of the pad. The product covers the whole surface of the pad which ensures even cutting, polishing and product application. Unique hexagonal cells with grooves (pores) cut by laser bring the air to friction area and perfectly cool down the whole contact area and prevent the paint from overheating. New HEX_LOGIC technology solved all weaknesses and imperfections of regular pads. The used Acu - Foam technology enables to use open cells of different sizes, thus ensuring required hardness of the pad necessary for various types of applications (cutting, polishing, final polishing and product application). The smaller the cells, the denser (harder) the construction. The more the cells are open, the more air they bring to the friction surface. Each product needs the right amount of air which the HEX-Logic construction ensures.

Advantages of the cleaning/polishing pad with the new HEX-LOGIC technology:

- it is the newest technology in polishing pads and polishing itself.
- laser-cut surface of the pad enables the pad to perfectly conform to rounded surface of the bodywork with constant pressure
- hexagonal cells with grooves absorb polishing paste which is gradually and evenly released during your work. As a result the polishing paste's consumption is reduced and its splashing outside the treated surface is limited. It maximally saves the product consumption.
- the grooves enable the air to access the polished surface and reduce the risk of overheating of the surface This way the friction, as well as the heat created between the pad and the treated surface is reduced.- these new polishing and finishing pads are ideal for all types of waxes
- they provide better control, less product waste, more accurate results and overall better and more efficient application
- this new design of pads surface enables a longer time of application without the need to refill the product and thus ensures better polishing and cutting process.
- HEX-LOGIC technology prevents the paint surface from being damaged due to accidental lack of the product, reduces surface temperature and prevents the product from leaking during vertical application
- the pads are attached to the backing plate using a permanent Velcro on the back side which ensures that the pads are easily removed to be washed or maintained and attached to be used again.

Long-lasting durability and material guarantee make the pads suitable for professional use. The cutting surface doesn't detach from the foam like pads with classic construction. A unique glue and production technology ensure long-lasting durability and quality use of the pads.

Each pad has a different colour and foam density. Cutting, application and polishing pads' maintenance and cleaning:

All pads need to be cleaned after every use. Regular care prolongs their durability, ensures quality work and prevents the paint surface from being scratched - to remove hard and dried polishing or cutting paste use genuine horsehair brush (ACC_663). Use BUF_333_16 - FOAM & WOOL CITRUS - Based Pad Cleaner for gentle final cleaning.

17. Hex - Logic Light - Medium Polishing Pad White - application and polishingpads white

- for machine rotary polishing/cleaning with the PORTER CABLE 7424 Orbital polisher (code : BUF_100.1XP) and for application of sealants and waxes and soft final polishing of your paint using Chemical Guys' or other world manufacturers' polishing and cutting products.

Product Code :**BUFX_104HEX4** - application/polishing - Ø 10,5 cm = (4,0" Inch)

Product Code :**BUFX_104HEX5** - application/polishing - Ø 13,5 cm = (5,5" Inch)

Product Code :**BUFX_104HEX6** - application/polishing - Ø 16,0 cm = (6,5" Inch)

Medium Polishing - this soft pad is designed for micro - soft polishing and waxes and sealants application. This pad has a very fine cutting surface and is ideal for waxing and fine cleaning, as well as finishing and polishing applications. It isa very firmfoam with small open cells. This special foam pad is firm enough to remove dirt, while delivering high shine finish to your paint surface.

HEX_LOGIC pads are formulated with laser technology and ensure professional use and maximally accurate application of a polisher with 100 % coverage on any flat, rounded or vertical surface. HEX_LOGIC pads were designed on the model of honeycombs which ensures that the product stays in the grooves (container) and is evenly distributed over the whole surface of the pad. The product covers the whole surface of the pad which ensures even cutting, polishing and

product application. Unique hexagonal cells with grooves (pores) cut by laser bring the air to friction area and perfectly cool down the whole contact area and prevent the paint from overheating. New HEX_LOGIC technology solved all weaknesses and imperfections of regular pads. The used Acu - Foam technology enables to use open cells of different sizes, thus ensuring required hardness of the pad necessary for various types of applications (cutting, polishing, final polishing and product application). The smaller the cells, the denser (harder) the construction. The more the cells are open, the more air they bring to the friction surface. Each product needs the right amount of air which the HEX-Logic construction ensures

Advantages of the application/polishing pad with the new HEX-LOGIC technology:

- -it is the newest technology in polishing pads and polishing itself.
- laser-cut surface of the pad enables the pad to perfectly conform to rounded surface of the bodywork with constant pressure
- hexagonal cells with grooves absorb polishing paste which is gradually and evenly released during your work. As a result the polishing paste's consumption is reduced and its splashing outside the treated surface is limited. It maximally saves the product consumption.
- the grooves enable the air to access the polished surface and reduce the risk of overheating of the surface This way the friction, as well as the heat created between the pad and the treated surface is reduced.- these new polishing and finishing pads are ideal for all types of waxes
- they provide better control, less product waste, more accurate results and overall better and more efficient application
- this new design of pad's surface enables a longer time of application without the need to refill the product and thus ensures better polishing and cutting process.
- HEX-LOGIC technology prevents the paint surface from being damaged due to accidental lack of the product, reduces surface temperature and prevents the product from leaking during vertical application
- the pads are attached to the backing plate using a permanent Velcro on the back side which ensures that the pads are easily removed to be washed or maintained and attached to be used again.

Long-lasting durability and material guarantee make the pads suitable for professional use. The cutting surface doesn't detach from the foam like pads with classic construction. A unique glue and production technology ensure long-lasting durability and quality use of the pads.

Each pad has a different colour and foam density. Different material construction of the pads (hardness) enables to perform different paint care operations, such as cleaning (decontamination), cutting, application of sealants and polishes and final polishing. All pads were designed and produced in California, USA and regarding their technology they are the only ones of their kind. It is the newest patented material (foam) with a perfect springing and without vibrations ensuring the best balanced contact with the surface.

21. FOAM & WOOL CITRUS – BASED PAD CLEANER -is a new cleaning and renovating product designed for all types of cutting, polishing, application and finishing pads, as well as all types of application sponges and products. This natural citrus-based cleaner contains a special conditioner which impregnates pads' surfaces with a long-term effect, thus prolonging their durability. It perfectly removes grease, contamination, correction and polishing pastes, synthetic polishes and waxes residue.

Product Code : **BUF_333_16**(16 oz)

Product Code : **BUF_333**(1 Gal)

MULTIFUNCTIONAL USE FOR ALL TYPES OF PADS AND APPLICATORS

Regular package with dispenser – (16oz) – 0,473 L

Big package can (1Galon) – 3,8 Litre

This new cleaning and impregnation product is the only one of its kind. It contains natural citrus extracts with natural degreasing agents which break down all grease and perfectly remove all contamination, correction and polishing pastes, glazes, dressings and synthetic polishes and waxes residue. The product also contains a special conditioner which impregnates the pads' surfaces with a long-term effect, thus prolonging their

durability. The pad cleaner leaves the pads, sponges and applicators as new and ready to be used again.

APPLICATION:

Dilute the product as needed with warm or cold water to create cleaning foam to wash the pads and applicators in. FOAM & WOOL CITRUS can also be sprayed directly onto contaminated surface and applied without water using the **Foam Pad Conditioning Brush** - Product Code: **BUF_900** or the **Foam Pad Cleaning Brush** - Product Code: **ACC_991**. We recommend that professionals clean the pads mechanically using a special bucket especially designed for cleaning and renovation of pads, the **GRIT GUARD**

UNIVERSAL - Product Code: **IAI_507_3** .This bucket contains a special shaped grid and a lid. Just insert the polisher with the pad into the bucket, turn the polisher on and the grid will clean the pad and dry it using a centrifugal force. Use the FOAM & WOOL CITRUS with water for this cleaning process.

PRODUCT ADVANTAGES:

- the product perfectly and quickly removes products, contamination and grease residue
- not only cleans, but also impregnates and maximally prolongs life of pads and applicators
- it does not leave any residue as conventional detergents and washing powders. An ideal solution creating a highly effective cleaning foam.
- it is a new cleaning and renovating product for all types of cutting, polishing, application and finishing pads. as well as all types of application sponges and products.

22. BALL BUSTER Wheel & Rim Polisher System- a special, professionally designed polishing ball for cleaning and polishing of hard-to-reach areas, wheels and rims and complex parts of the bodywork. The ball can be attached to a spindle of any drill.

Product Code :**ACC_104_2** (2,5inch - Ø 6,30cm)

Product Code :**ACC_104_3** (3,0inch - Ø 7,50cm)

Product Code :**ACC_104_4** (4,0inch - Ø 10,00cm)

This special new product in a ball shape is designed for perfect cleaning and polishing hard-to-reach polished surfaces of the bodywork, profiled wheels and other complex parts of your car. All these hard-to-reach places are cleaned and polished to a perfect shine. Available in Ø 6 cm Ø 7,5 cm + Ø 10 cm size. This tool can be easily attached to a spindle of any drill and is designed for revitalization of all surfaces and materials, such as diamond plates, polished aluminium, chromium, stainless steel, paints, carbon fibres and glass and other surfaces. For cleaning and polishing you can use any Chemical Guys wax or polishing or impregnating product. Highly resistant, elastic, professional construction of the ball enables to perfectly conform to all shapes of surfaces. The ball is made of a special DURAFOAM covered with fibersoft materials which prevent the treated surface from being scratched.

PRODUCT ADVANTAGES:

- it saves time and laborious work.
- multifunctional use on any rounded or complex surfaces that need to be cleaned or polished.
- ideal for polishing big areas, motorcycles, trailers or caravans. - an easy and quick attachment to a spindle of any drill
- a resistant construction of a material with heavy - duty vinyl surface ensures long durability, maximum effect and easy washability.
- the soft malleable surface of the ball prevents the surface from being scratched.

WARNING: rough and hard contamination needs to be removed from the treated surface with a cleaner and a microfiber towel.

ADHESIVE REMOVER - a remover – cleaner designed to remove asphalt, adhesives and tar from the surface of your paint and other parts of the bodywork. It removes dirt quickly, carefully and without residue. The product is appraised as one of the most effective asphalt cleaners and adhesive removers in the world.

Productcode : TW OCHP 3102

This multifunctional, highly effective cleaner and adhesives, asphalt and tar remover can clean local and large-area adhesive, asphalt and tar contaminations and other ingrained road dirt in a short time. It perfectly removes asphalt and tar dirt of any extent and size. It removes glue residue from stickers and toll stickers. It fully removes reversible plastic adhesives that stay on after removal of self-adhesive weights from wheels. This asphalt remover easily manages to clean dirty side area of a car that went through soft asphalt or freshly applied road penetration. Above all, the product manages to remove large-area adhesives from the bodywork after your car wrap is taken off, as well as adhesives from other advertising surfaces.

PRODUCT ADVANTAGES :

- the product dissolves asphalt, tar, adhesives and other road contaminations immediately after it is sprayed onto the surface
- due to immediate decomposition of the contamination there is no paint damage caused by excessive rubbing
- there are no stains or smudges left on your paint after the cleaning
- the product quickly and perfectly cleans even big contaminated areas

APPLICATION: Just spray the product on contaminated surface or adhesive residue and allow it to work for 3 - 5 minutes. Then wipe the dirt away with a Microfiber towel or soft paper towels.

WARNING: When cleaning large-area asphalt or tar contaminations it is necessary to cover the garage floor because the dissolved dirt flows down and drips on the floor of your garage or workshop!!

7. Watermelon Odor Eliminator & Premium Air Freshener, Heavy Duty Formula - a new natural enzymatic odor eliminator with antibacterial effect designed for interiors of heavily polluted and smelling vehicles, for public toilets, showers and similar problematic environments. It eliminates the cause of odors and leaves a pleasant and long-lasting watermelon scent.

Product Code : **SPI_144N_16** (16oz)

Product Code : **SPI_144N** (1Gal

EXTERIOR / INTERIOR + MULTIFUNCTIONAL USE

Regural package with dispenser (16oz) – 0,473 Litre

Big package can (1Galon) – 3,8 Litre

The latest professional antibacterial air freshener with long-lasting durability designed for interiors of heavy smokers' cars, as well as other heavily stinking interiors. It is mainly used for all places which need to be divested of unpleasant smell (such as smell of cigarettes, cigars, cats, dogs or vomit). This professional product, made of natural ingredients, is technologically the latest odor, bacterium and microbes eliminator and air freshener of its kind. Its formulation allows its natural enzymatic ingredients to quickly eliminate source of the odor (not suppress and mask it) caused by biological decomposition, such as strong smells, bacterium, urine odor (uric acid), odor from cigarette and cigar smoking, musty smell and milk, coffee or mould odor. It also perfectly eliminates body odor and odor from sweating, high humidity, musk, car and household odors, vomit odor and odor of animals and their urine. After the application the product leaves natural watermelon scent for a long time. The product is concentrated but can be diluted in a ratio of 1:2 (1 part product and 2 parts water) or as needed.

APPLICATION:

First Hoover and clean the affected areas with the CG All Purpose Cleaner **CLD_1010_16**, CG Extreme Orange Degreaser **CLD_106_16** or CG Nonsense **SPI_993_16** using a Microfiber towel **MIC_102_01**. Spray the product onto affected areas and then spray it lightly onto and under carpets, under dashboard, seats and into air vents. You can also apply the product into door compartments, luggage compartments and anywhere dirt can decompose. The product delivers perfect effect and sense of purity.

This product is used by professionals in car industry - (car sellers, auto detailers, professional car washes), in hotels, hospitality, by home owners and janitors, cleaning companies and house cleaners all around the world.

PRODUCT ADVANTAGES:

- an easy application, just spray the product onto the surface and let it work
- the world's most effective enzymatic antibacterial product
- it is concentrated and can be diluted according to desired needs with up to 2 litres of distilled water
- it perfectly eliminates all odors with long-lasting effect
- after the application it leaves fresh watermelon scent
- aromatherapy (fresh melon scent) improves the state of mind and body
- water-based fragrances do not leave stains on fabrics, carpets or upholstery
- the product is 5 times more effective than similar products in the market
